RANGAT NATURALS — Social Media Operating Plan

How to use this book: This is the operating manual for a zero-brand Indian skincare company run by one founder (+ one part-time editor). Section 2 tells you the 5 ways every post gets made (almost none need your face). Section 3 builds the Instagram on Day 0. Section 4 is the batch system that turns one weekend into 7-14 days of content. Section 5 is the 12-category AI prompt library. Section 6 is Instagram SEO as a sales channel. Section 7 is the 30-day calendar — every field for every day. Sections 8-17 are the systems (stories, schedule, formats, stock, carousels, mix, proof, UGC, influencers, Meta Ads). Sections 18-21 run the sales funnel, the analytics, the 30/60/90 plan and the red lines. The Reference Library at the end carries the 13 requested libraries (100 hooks, 50 reel ideas, 30 carousel ideas, 30 story ideas, 20 UGC ideas, 20 influencer ideas, schedules, checklists, launch plan, 30/60/90).

The North Star (read before every decision)

Main goal: REAL CUSTOMERS AND SALES — not followers, not likes. Every post must answer: *which stranger will this make buy, and how will they buy (DM "GLOW" → WhatsApp → COD)?* Vanity metrics are tracked as fuel; they are never the goal.

Ground rules (non-negotiable):

- No fake reviews, testimonials, before/after, followers or engagement — ever.
- No guaranteed results, no "cure / remove / permanent / 100%", no medical claims, no unverified claims.
- No downloading copyrighted/Instagram content — free legally-usable stock only (Section 11).
- RANGAT NATURALS is a brand, not a manufacturer ("hum manufacturer nahi hain" is a selling line). Products are private-label, third-party manufactured, sold under our own brand.
- One focus product at a time: Vitamin C Serum 10% + Face Wash + Moisturizer first; Sunscreen wave 2 (D45-60), Night Cream wave 3 (D75-90), Lip/Hair/Body care post-90.
- Gujarat first → West India → India. The brand is Indian from Day 1; the energy starts in Ahmedabad/Gujarat.
- Founder's face is optional, not required. Voice-over, hands, product, AI creators and UGC creators carry the content (Section 2).
- Always "RANGAT NATURALS" — never a placeholder.

1. THE FIVE PRODUCTION METHODS (face-free by default)

Every post in this plan is labeled with ONE of five methods. Pick the primary; keep the alt. Rule: at least 70% of the month is made with methods 2–4 (no human face at all); method 5 brings real human faces that are NOT the founder (creators/customers with consent); method 1 is AI-only B-roll/teasers (always labeled where a person appears).

Met hod	Name	What it is	Tools	Typical cost
1	Generated completely with AI	AI video/image B-roll, concept teasers, carousel backgrounds. Any AI person is labeled "AI concept" and never presented as a customer.	AI video (Kling / Hailuo / Runway / Veo — free tiers or ~₹500–1,500/mo) + AI image (free tiers)	₹0–1,500/mo
2	AI + product image	AI B-roll/plates + YOUR real product photo/insert + your voice-over. The product is always the real bottle/box.	Same AI tools + phone photos + Canva + CapCut	₹0–1,500/mo
3	Free stock + simple editing	Legally-usable stock (Pexels/Pixabay/Unsplash) for hands/texture/scene B-roll + your product insert + your voice/text. NEVER stock as your product or customer.	Pexels/Pixabay/Unsplash (free) + CapCut	₹0
4	Real product footage	Your phone + your real products + hands + voice-over. The workhorse: texture, how-to, BTS, packing, launch. No face needed.	Phone + ₹500 tripod + one warm lamp (<₹1,000 total) + CapCut	₹0
5	Micro-influencer / UGC creator	A real Gujarat creator or customer films in her space; you brief, supervise, add overlays, and get written ad rights.	Creator's phone + your brief (Section 16) + signed consent	₹500–2,000 + product (Section 16)

Where each method wins:

- Method 1: hook-testing (5s/8s), carousel backgrounds, ad statics, concept teasers ("aapki kahani bhi yahan ho sakti hai" — labeled).
- Method 2: education reels with a human "character" (recurring AI face, consistent sheet), myth flips, routine B-roll.
- Method 3: problem/scene B-roll you can't shoot (oily face close-ups, monsoon windows, chai tables).
- Method 4: everything about the product — hero shots, texture, how-to, packing, launch, box contents. Authenticity is the brand; the product is never faked.
- Method 5: proof — testimonials, unboxings, 4-hafte journeys, collabs. Real faces = trust (consent + rights, always).

The face-free stack (your "studio"): phone (any modern phone) · ₹500 mini-tripod · one 2700K warm lamp (~₹400) · CapCut (free) · Canva (free) · Pexels/Pixabay/Unsplash (free) · AI video/image (free tiers to start) · a stack of books as a phone stand. Total: under ₹1,500.

AI rules of the road (all methods):

1. AI never renders "RANGAT NATURALS" text or a readable label — generate plain/blurred, add the real label + hook text + CTA in CapCut.
2. One consistent AI character sheet (Section 5) — the same face in 5–10 videos builds trust.
3. Skin realism: "natural texture, visible pores, no retouch" in every prompt — no beauty filter, ever.
4. Real proof = real humans only (method 4/5). AI = concept/teaser/B-roll only, labeled when a person is shown.

2. DAY 0 — CREATE & MANAGE THE INSTAGRAM PROFILE (do before post #1)

One sitting, 3–4 hours. Type the exact strings below.

2.1 Account basics (exact values)

#	Step	Exactly what to do		
1	Account type	Personal → Professional → Business → Category: Beauty & Cosmetics		
2	Username strategy	Try in order: @rangatnaturals → @rangatnaturals.in → @rangatnaturalsindia → @rangat_naturals. Cleanest available wins; identical on WhatsApp Business, Facebook, YouTube Shorts. No numbers, no underscores if avoidable. Never change again.		
3	Name field (it is a SEARCH field)	**` RANGAT Naturals	Indian Skincare`** — Instagram search matches the name field first. After sunscreen launch: `RANGAT Naturals	Serum & SPF India`
4	Bio (4 lines, each does a job)	The exact block below — keyword-loaded for search		
5	Bio link	Linktree/Stan Store, 3 items max, ordered by conversion: ① WhatsApp click-to-chat ② Website (if live) ③ Waitlist/offer page		
6	Contact buttons	WhatsApp + Email (Settings → Contact options)		
7	Profile picture	Founder's face (warm, real, no heavy filters) — the ONE place a face is required. A face in the avatar converts a zero brand better than a logo. If you refuse: use the product bottle on a cream background — second best, but the face wins.		
8	Management	Founder = admin on IG + WhatsApp Business + the master Sheet (Section 19). One part-time editor gets content access (not the brand login).		

THE EXACT BIO (type character-for-character):

IN Indian skincare — Aamee skin, aamno liye
 Vitamin C 10% · Face Wash · SPF — 4–6 hafte ka honest timeline
 COD · Free shipping (launch) · WhatsApp par support
 ↓ DM "GLOW" ya WhatsApp par order karo

Why it works (3-second test): line 1 = category + origin + signature ("Indian skincare" is the searched phrase) · line 2 = what we sell + honest timeline (no miracle = instant trust) · line 3 = kills the #1 fear (COD + support) · line 4 = one action (DM "GLOW"). Keyword load: Indian skincare, Vitamin C, Face Wash, SPF, COD, WhatsApp — all real search/decision words.

2.2 Highlights (6 shells, built Day 0)

Cover style: cream background, terracotta icon, one word each (Canva, 405×405).

Highlight	Contents	Update cadence
RESULTS	Day-1→28 tester photos (disclosed), review clips, "1 mahine ki journey"	Every new result
HOW TO USE	5-step VC how-to, 60-sec routine, layering order	Permanent + 1/season
REVIEW	Customer videos, quote cards, unboxings	Weekly
FOUNDER	Who we are, why Gujarat first, 20-tester story, workspace tour	1/month
INSIDE	Ingredients explained, batch card, "hum manufacturer nahi hain", packaging	1/month
OFFER	Current offer (Founding 100 → then current), COD explainer, referral	Every offer change

RESULTS is always first — for a zero brand, proof is the trust hook.

2.3 Pinned posts (3 — pin as they arrive)

Pin	Post	Job
Pin 1	Hero product + offer (Day 8 intro / Day 21 launch)	What to buy + how
Pin 2	Day-28 before/after with disclosure (Day 17)	Why trust us
Pin 3	Brand/founder identity (Day 1 or Day 13)	Who we are

Re-pin review every 2 weeks; Pin 2 rotates with newer proof; Pins 1/3 stable 90 days.

2.4 DM, comment & conversion settings (the order engine)

1. DMs ON for everyone (Message controls → allow all).

2. Quick replies (Business tools → Quick replies):

- `GLOW` → "Namaste! Vitamin C Serum 10% — ₹600 (launch me free Face Wash mini + free shipping). COD hai. Aapka naam + city + WhatsApp number? Hum 15 min me reply karte hain."
- `COD` → "COD = Cash on Delivery. Parcel pehle aata hai, dekh kar paisa do. Gujarat me 2-4 din."
- `PRICE` → "Vitamin C Serum 10% — ₹600. Launch offer me free Face Wash mini + free shipping. DM 'GLOW' for order."

1. Auto-reply (IG + WhatsApp Business), exact text:

"Namaste! RANGAT NATURALS yahan. 'GLOW' likhiye product + price ke liye. COD hai. Koi sawaal? Hum insaan hain, bot nahi."

1. Comments stay ON (visibility = trust); hide-list = obvious spam/abuse only. A zero brand that silences comments looks guilty.

2. Reply SLAs (on the calendar, not in your head): comments within 2 hours (launch week 15 min) · DMs within 15 minutes (7:00 AM-11:00 PM) · outside window: "Hum 7:00 AM se reply karte hain — GLOW likhiye, pehle number aapka hoga."

3. WhatsApp Business: catalog = 1 product (VC Serum 10%, ₹600, real photos) · click-to-chat link → bio link · same auto-reply · labels: new / GLOW / COD / D7 / D28.

4. Reviews from Day 1: every order gets the D28 photo + 1-line review request (Section 18) — reviews are the product of the funnel, not an afterthought.

2.5 Day-0 checklist

- [] Professional account + Beauty & Cosmetics · username final (matching WA/FB/YT)
- [] Name field = "RANGAT Naturals | Indian Skincare" · bio = exact 4 lines
- [] Avatar (founder's face or product fallback) · link = 3 items, WhatsApp first
- [] WhatsApp + email buttons · 6 highlight shells (cream/terracotta covers)
- [] Quick replies GLOW/COD/PRICE · auto-reply live (IG + WhatsApp)
- [] SLAs on calendar (15-min DM, 2-hr comments, first-60-minutes duty)
- [] Pins planned: D8 / D17 / D13 · alt text from post #1 · master Sheet 6 tabs built (45 min)

3. EASY CONTENT PRODUCTION SYSTEM (batch 7-14 days in one weekend)

This is how one person + one part-time editor never runs out of content. Batch philosophy: shoot/generate in 2-day cycles, post daily, always keep a 3-week buffer.

3.1 The Sunday 6-hour batch (produces 7 days)

Block	Hours	Output
1 · Hooks + scripts	1 h	7 hooks written (one per day, from the 100-hook library — never the same style twice in a row, never reused this month) + 2 carousel outlines + VO scripts read aloud once
2 · AI batch	1.5 h	Queue 5-7 AI generations (3-5 takes each for the method-1/2 days) — runs while you shoot; pick best take per day
3 · Shoot session (method 4)	2.5 h	ALL real footage for the week: 8-10 reels' worth of shots + 4 ad cuts + 10-12 story frames + 2 carousels' flat-lays. One window, one light, one table — change props between shots, never the light.
4 · Edit night (with editor)	3 h	Cut 7 reels (hook text 0-2s, CTA card last 1.5s, real VO) + 2 carousels in Canva + 14 story frames + ad cuts labeled
5 · Lock	30 min	Calendar locked (times from Section 9) · hashtags assigned (12 sets, rotated) · alt text + location tags ready · Sheet updated

Total: ~8 hours (split Sun 4h + a weekday 4h) = 7 days live. For 14 days: run the cycle twice, or extend the shoot to 4h (16-20 reels) — the editing cost stays roughly the same because templates are reused.

3.2 Asset multipliers (1 shoot = many posts)

- 1 long reel = 3 posts: the 5s hook (AI or real), the 15s cut, the 30s story arc.
- 1 carousel = 4 assets: the carousel + 6 story frames + a 45s voice-over reel + 1 ad static.
- 1 packing session = 10 clips: tissue fold, product in box, card, stamp, seal, "1/100", courier label, WhatsApp confirmation, D1 parcel, D28 photo.
- 1 texture shoot = 8 macros: drop, spread, absorb, on cheek, on back of hand, bottle pour, label close-up, flat-lay.
- 1 customer = 5 assets: unboxing clip, quote card, chat frame, review story, referral story.

3.3 Free / low-cost tool stack (exact)

Job	Tool	Cost
Editing (reels, cuts, text, captions)	CapCut (mobile or desktop)	Free
Carousels, story frames, covers, quote cards	Canva (master cream/terracotta template)	Free
Stock (method 3)	Pexels · Pixabay · Unsplash (commercial use, no attribution)	Free
AI video (methods 1-2)	Kling / Hailuo / Runway / Pika — start on free daily credits	₹0 to ~₹500-1,500/mo
AI image (backgrounds, flat-lays, ad statics)	Any current AI image model free tier	₹0
Voice-over	Your real voice (record in a quiet corner in CapCut). TTS only for generic educational B-roll, never for proof/sales	Free
Gear	₹500 tripod · one 2700K lamp (~₹400) · book-stack phone stand	<₹1,500 total
Planning/tracking	Google Sheets (6 tabs: calendar / hooks / UGC / ads / creators / KPI)	Free

3.4 The 5-step edit (every reel, 15 min each)

1. Cut: 2-3s per shot, hook in first 2s (spoken + text + product/hand movement).
2. Text: max 2 sizes — hook biggest (top or center), CTA last 1.5s on a card.
3. Audio: your VO at 0 dB, one ambient track at -20 dB (or real liquid/room sound).
4. No face filters, no beauty retouch. Skin texture is the brand.
5. Export: 1080×1920 (9:16) reels/stories · 1080×1350 (4:5) carousels.

4. THE 12 AI PROMPT CATEGORIES (ready-to-copy templates)

Paste the character sheet into any "person" prompt:

CHARACTER: Indian woman, 26, medium-tan skin with natural texture and visible pores, light brown eyes, shoulder-length straight hair, small nose stud, no makeup (tinted lip only), simple beige cotton kurta. Warm, calm, slightly smiling. No beauty filter, no skin smoothing, no airbrushing — realistic, slightly imperfect, natural.

(Male variant: Indian man, 28, light stubble, short black hair, white T-shirt, natural skin. Gen-Z variant: Indian woman, 20, college hoodie over kurta, ponytail, no makeup, natural skin.)

Every prompt below ends the same way: "No readable brand text, no logo, no on-screen text — text added in CapCut. 9:16."

4.1 Instagram post (single image)

AI image, 1080x1350 (4:5), realistic photo: [PRODUCT: small amber serum bottle / kraft box with tissue / glass of water + towel] on [SET: cream marble bathroom counter / wooden kitchen table with chai glass], soft window side-light, warm Indian home, slight lived-in texture, clean negative space top-third for text. No readable brand text, no logo.

4.2 Carousel (backgrounds + structure)

AI image, 1080x1350, [6 backgrounds]: cream (#F6F1E7) background, soft top light, one minimal Indian home prop in a corner (chai glass / towel / small plant / amber bottle / leaf), terracotta accent, large clean negative space for bold text, realistic photo style, no readable text.

Then in Canva: slide 1 = hook (big terracotta type) · slides 2-5 = one idea each (≤12 words) · slide 6 = CTA + real product photo.

4.3 Reel B-roll (by length — 5/8/10/15/20s)

AI video, [LENGTH] seconds, 9:16 vertical, UGC handheld feel. Indian woman 26, [CHARACTER], [SCENE: home bathroom counter / kitchen table / bedroom window / packing table], [LIGHT: soft window daylight / warm evening lamp / cool monsoon light]. [CUTS: e.g., Cut 1 (0-3s) she wipes a sheen from her forehead, tired face; Cut 2 (3-6s) close-up one drop of serum into palm; Cut 3 (6-[LENGTH]s) she pats her cheek, calm smile.] Handheld phone, slight natural shake, eye-level. Real Indian home background, slightly lived-in, not staged. Natural skin texture, visible pores, no retouch. Natural ambient sound. No readable brand text, no logo, no on-screen text.

Post-production (CapCut): real product insert (1 frame) · hook text 0-2s · CTA card last 1.5s ("DM GLOW · COD") · real voice-over.

4.4 AI creator video (the recurring character)

AI video, 15 seconds, 9:16, UGC style, RECURRING CHARACTER (use the exact same character sheet every time — consistency is the point). Indian woman 26, [CHARACTER], [SCENE]. She speaks directly to camera in a natural, slightly imperfect way: [BEAT 1: hook line] → [BEAT 2: honest detail, one small negative] → [BEAT 3: calm verdict]. Handheld, eye-level, real home background, window light. No readable brand text, no logo, no on-screen text.

Mandatory post-production: label "AI concept" top-frame for first 3 seconds · real product insert · CTA card · real human voice-over (never TTS) · NEVER captioned as a customer.

4.5 Product demonstration

AI video, 8 seconds, 9:16, macro product film. Close-up of a small amber skincare bottle (plain label, no text) on cream marble, a glass of water beside it, warm window light. Camera: slow push-in → one golden drop falls from dropper into a shallow dish, light refracts through it → fingertip spreads the drop, thin fast-absorbing texture → quick pat on back of hand. Realistic, no smoothing. Slow

drift, macro focus pull. Natural liquid sound only. No readable brand text, no logo.

Swap the plain label for your real bottle in CapCut (product insert) before posting.

4.6 UGC video (concept/teaser — labeled)

AI video, 12 seconds, 9:16, UGC hand-cam. Hands of a young Indian woman (natural skin, no nails polish, simple cotton sleeve) opening a kraft parcel on a bed: tissue, a small amber serum bottle, a small face-wash mini, a thank-you card. Natural excitement, slight handheld shake, afternoon light, real Indian bedroom. No readable brand text, no logo.

Label: "AI concept — aapki kahani bhi yahan ho sakti hai" · CTA "DM GLOW". Real customer UGC (method 5) always outranks this.

4.7 Voice-over script (Hinglish, face-free)

Template (40-60 words): [HOOK — the problem in their words, 1 line] → [TENSION — why it happens, 1 line] → [PROOF/PRODUCT — what we do, 1 line, safe claim] → [HONEST LINE — the "4-6 hafte, fake nahi" beat] → [CTA — "DM GLOW, COD hai".]

Write a 50-word Hinglish voice-over for a 15-second skincare reel. Hook in the customer's own words (Gujarat, monsoon, 40 degree, AC, dhool). One honest detail (no miracle — "4-6 hafte"). End with "DM GLOW, COD hai". Tone: warm, calm, slightly dry humor. No medical claims, no "cure/remove/100%".

4.8 Captions

Write an Instagram caption for [POST TYPE] about [TOPIC]. Line 1 (before the fold) must be the search phrase in natural Hinglish (e.g., "Vitamin C serum kaise use kare — 5 steps"). Body: 3 short lines, one honest detail, RANGAT NATURALS mentioned once, COD + WhatsApp once. CTA: one action only. End with 3-5 of these tags: [SET]. No hashtags beyond the set, no "link in bio" spam, no miracle claims.

4.9 Hooks (generate 10 per style)

Give 10 scroll-stopping Hinglish hooks (each ≤12 words) for style [PROBLEM / CURIOSITY / MYTH / MISTAKES / RELATABLE-GUJARATI / FACT / QUESTION / URGENCY-TRUE] for an Indian vitamin-C-serum brand (COD, Gujarat, 4-6 week honest timeline). Rules: no "cure/remove/permanent/100%", no fake urgency (only real seat counts/dates), start mid-action, no "welcome". Each must name WHO it's for.

Kill/scale the hook log weekly (bottom-10 out, top-10 rewritten).

4.10 Story designs

Design 3 Instagram story frames (1080x1920, cream background, terracotta accents, bold simple type) for [SLOT: morning tip / afternoon BTS / evening CTA]. Frame 1: hook text ("Roz ka 1 sach: ..."). Frame 2: one value line + [poll / quiz / this-or-that] sticker placeholder. Frame 3: [CTA "GLOW likho" / link-sticker placeholder / countdown placeholder]. Indian home photo texture as B-roll background. No readable brand text.

4.11 Before/after CONCEPTS (AI never touches faces)

AI image, 9:16, background plate only: Indian bedroom, window side, warm evening light, empty space for a photo card, soft focus, realistic, no people, no text.

Workflow: REAL tester photographs (Day 1 / Day 7 / Day 14 / Day 28 — same light, angle, distance, printed card in frame, no filter) → CapCut: 3s per card + her 5s line → text "Day 1 → Day 28 · 4 hafte · Results may vary" on every export → consent file saved. AI supplies only the empty background plate if the room is cluttered.

4.12 Educational content (60-sec script)

Write a 60-second Hinglish education script for [TOPIC: layering order / patch test / SPF 30 vs 50 / vitamin C myths]. Structure: 2s hook (a question) → 3 beats (5-8s each, one fact each, plain words, one everyday analogy — chai, thepla, SG Highway) → 1 honest line ("yahan tak sach hai, aage marketing hai") → CTA "Save karo · DM GLOW". No medical claims, no named brands, no cure language.

Compliance for all 12 categories: the prompt output is a DRAFT. Every claim is checked against the formula sheet / tester report before it ships; every proof asset gets consent + "Results may vary"; every AI person gets the label.

5. INSTAGRAM SEO STRATEGY (a zero-budget sales channel)

Instagram search + YouTube search answer "vitamin c serum price in india" and "skincare routine for oily skin" every day. For a zero-budget brand, search is the only reach that compounds for months — a Reel dies in 48 hours; a search-optimized post lives. SEO also makes Meta Ads cheaper: on-page keywords improve relevance scoring for ad delivery.

5.1 Every SEO surface (in ranking order)

Surface	Rule	
Username	@rangatnaturals — the brand term itself; keep it everywhere (WA/FB/YT) so the brand shelf stays one place	
Name field (highest weight, 30 chars)	`RANGAT Naturals`	Indian Skincare` — the category keyword lives in the name
Bio keywords	"Indian skincare" (line 1) + Vitamin C / Face Wash / SPF / COD / WhatsApp (lines 2-4) — the exact searched phrases	
On-screen keywords	IG OCRs (reads) Reel text — the target keyword or its Hinglish form must appear in frame-1 text	
Caption keywords	Line 1 (first ~80 chars) = the search phrase in natural language — this is the search snippet	
Reel titles	Set the IG Reel title = the keyword phrase (e.g., "Vitamin C serum kaise use kare — 5 steps"); YT Shorts title formula: `[Long-tail question] — [promise] (RANGAT)` , description = 2 lines + 5 keywords + link	
Alt text	Manual, every post: "[Product] being used on real skin, RANGAT NATURALS Indian skincare."	
Hashtags	8-15 per post from the 5-set framework (Section 5.4) — topic clustering, not incantations	
Location keywords	Tag + name-field language: Ahmedabad / Amdavad / Gujarat (every local post) → Surat, Vadodara, Rajkot, Gandhinagar in waves → city names only when content targets that city	
Replies	Comment conversations around the keyword are indexed — seed 2-3 genuine comment prompts per post	

5.2 Search intent — which keyword type, where

Intent	Keywords	Where they go
Product (buy-intent)	vitamin c serum india · vitamin c serum price in india · best vitamin c serum india · face wash for oily skin india · sunscreen spf 50 india · no white cast sunscreen · night cream for glow · gel moisturizer india · lip balm india	Hero posts: caption line 1 + on-screen text + reel title + YT title

Intent	Keywords	Where they go
Problem (top-funnel)	skincare for oily skin · dull skin routine · monsoon skincare tips · hard water face problem · acne prone skin care routine india (copy: "gentle routine")	Problem reels: hook = the problem in their words
Education (save-intent)	vitamin c serum kaise use kare · layering order skincare · patch test kya hai · spf 30 vs spf 50 · skin barrier kya hai	Carousels + 45s reels; the "smart brand" moat
Long-tail (YT gold)	best vitamin c serum under 500 in india · naye brand se skincare order kaise kare safe · cash on delivery skincare brands india · ahmedabad skincare brand · gujarat me best sunscreen	YouTube Shorts (3/week, Fridays) + monthly keyword Reel
Local / Gujarat	gujarati skincare tips · amdaad (Amdavad) skincare · ahmedabad skincare brand · rajkot dry winter skin	Gujarat-anchored posts: location tag + caption + on-screen text
Gujarati/Hindi phrases (underserved)	"chamak ke liye kya lagaye" · "chehre par chamak ke tips" · "tan hatane ke tips" (copy: tan-look tips) · "khushk chehre ke liye kya lagaye" · "Vitamin C serum ka use kaise kare"	Spoken in Hinglish content + caption line 1 (many users type in Hindi)

One dedicated "keyword Reel" per product per month whose entire job is a search query (title = the query). This is the compounding asset.

5.3 The keyword banks (copy, rotate weekly)

- Product: vitamin c serum india · vitamin c serum price in india · best vitamin c serum india · vitamin c serum for oily skin · face wash for oily skin india · best face wash for men india · face wash for sensitive skin · moisturizer for oily skin india · gel moisturizer india · sunscreen for oily skin india · best sunscreen india · sunscreen spf 50 india · no white cast sunscreen · night cream for glow · night cream india · face cream for dry skin india · lip balm india · body lotion india
- Problem: skincare for oily/dry/combination skin · dull skin remedy · glowing skin routine india · monsoon skincare tips · summer skincare routine india · winter dry skin routine · hard water face problem (Gujarat angle) · water spots on face

5.4 Hashtag framework (5 sets, 8-15 tags, 12 ready sets)

Every post: 1-2 brand + 2-3 product + 2-4 problem + 1-3 location + 2-3 niche = 8-15 tags. Never the same block twice in a row · never bought/irrelevant tags · launch posts get the full brand set · after 10k drop generic niche tags.

5.5 Monthly keyword audit (30 min, Sunday)

After Day 30: Insights → "searches that led to profile" → top 10 → 30% of next month's content is built from that list. Before Day 30, use the banks above.

6. CONTENT CATEGORIES & THE BALANCED MIX (not every post is an ad)

The ratio is fixed: Awareness 20% · Education 25% · Trust 30% · Sales 20% ($\pm 5\%$). Sales rule: after Day 15, exactly 1 in 5 posts is a direct-sell post (max 3-in-9 in offer windows). Never 2 sell posts in a row.

Category (your list)	Share	Formats	Calendar share
Education	25%	Carousels, how-to reels, myth-vs-reality, layering, 45s keyword reels	D3, D4, D7, D10, D18, D23, D28
Problem/solution	inside Attention + Education bridge	Problem hooks → 60-sec fixes	D1, D2, D11, D15
Entertainment / relatable	20% (with curiosity)	Gujarati skits, share machines, 5s hooks	D5, D14, D29
UGC	inside Trust (15-20% of feed)	Unboxing, testimonials, creator collabs, 4-hafte journeys	D19, D24, D26 + creator wave
Product education / demo	inside Trust + Attention	Texture, how-to, layering, "box me kya hai"	D8, D9, D16, D27
Trust (proof/BTS/founder)	30% — the biggest bucket	Disclosed B/A, reviews, founder VO, BTS, workspace	D6, D12, D13, D17, D22, D30
Testimonials / transformation	inside Trust	Real customer stories, disclosed Day-1→28	D12, D17, D26
Community	inside Sales/Attention	Referral, question boxes, "Amdavad wale", 30-day recap	D29, D30
Direct sales	20% — 1-in-5 after D15	Launch film, offer, COD, seat counts, referral	D8, D14, D20, D21, D27

Tag every post with ONE job before it ships (awareness / education / trust / conversion / retention). If a week's mix drifts, the next post must be Trust or Education. Sunday KPI review checks next week's mix. The 30-day calendar already encodes this — do not "fix" a day's type.

7. THE 30-DAY DAY-BY-DAY CONTENT CALENDAR (every field, every day, no day skipped)

Every day carries the 20 required fields: (1) DAY + DATE/PHASE · (2) PLATFORM · (3) POST TYPE · (4) BEST POSTING TIME · (5) LOCATION · (6) PRODUCTION METHOD (labeled 1-5) · (7) CONTENT IDEA · (8) FULL POST/REEL CONCEPT (+ slides for carousels) · (9) VISUAL/VIDEO DIRECTION · (10) OBJECTIVE · (11) SALES PURPOSE · (12) TARGET CUSTOMER · (13) HOOK · (14) SCRIPT · (15) ON-SCREEN TEXT · (16) CAPTION · (17) CTA · (18) INSTAGRAM SEO KEYWORDS · (19) HASHTAGS · (20) STORY SUPPORT (M/A/E) — plus the two creation tracks: AI GENERATION PROMPT (ready to copy) and HOW TO CREATE IT (free/low-cost steps). Hooks, scripts, captions and story lines are the established RANGAT lines, verbatim. No founder face required on any day — the 5 production methods (Section 2) say exactly how each day gets made.

How a day works (10 minutes to execute): read the 6-field meta table → produce with the labeled method (AI prompt or the how-to) → add on-screen text + caption + reel title + hashtags + alt text + location tag → post at the best time → post the 3 story slots at 8 AM / 1 PM / 8 PM → stay for the first 60 minutes and reply to every comment.

6	PRODUCTION METHOD	4 · REAL PRODUCT FOOTAGE (hands-only + VO) · Alt: 3 · stock B-roll (window/oily face) + your product close-up

CONTENT IDEA: Honest founder intro, no polish. "I'm starting a skincare brand from scratch — and I'll show you everything."

FULL POST/REEL CONCEPT:

VISUAL / VIDEO DIRECTION: Window side, 9:16, eye-level face-optional: film hands wiping forehead shine, product drop, pat. Soft monsoon light. Props: tissue, chai glass on sill.

OBJECTIVE: Identity + trust anchor (founder face) + series promise. · SALES PURPOSE: None directly (deliberate). Indirect: every future DM starts from this trust.

TARGET CUSTOMER: All — awareness cast. Especially 20–35 Gujarat.

HOOK (frame 1 — spoken + on-screen text): "Main ek naye skincare brand ki shuruat kar rahi hu — zero followers, zero budget. Aur main is series me SAB dikhaun gi, bilkul asli me."

SCRIPT OR ON-SCREEN TEXT — SCRIPT: "Hi, main [Name]. Main Gujarat se hoon, aur maine RANGAT NATURALS shuru kiya hai — Indian skin ke liye skincare. Is account par is chand me aap dikhoge: humne formula kaise choose kiya, 20 aahaiyon ne 4 hafte test kaise kiya, aur asli results kya aaye — filter nahi, fake photo nahi. Ek cheez promise karti hoon: jo dikhaayenge, wohi rahega. 30 din ke saath chalo. Pehla episode: hum kaun hain, aur kyun."

ON-SCREEN TEXT: [0-2s] "Zero followers. Ek sachchi shuruwat." → [mid] "20 testers · 4 hafte · 1 sachcha result" → [end] "RANGAT NATURALS — Asli skin. Asli result."

CAPTION (line 1 = SEO phrase): "Ek naya Indian skincare brand. Ek honest promise: jo dikhaayenge, wohi rahega. Pehla episode: hum kaun hain. #RangatNaturals #IndianSkincare #Ahmedabad"

CTA: "Follow karo — kal: 40 degree me aapki skin kar rahi hai kya?"

INSTAGRAM SEO KEYWORDS (in on-screen text / caption line 1 / reel title): skincare for oily skin · monsoon skincare tips · hard water face problem

HASHTAGS — Set 1 (Problem reel (oily/monsoon)): use ready-set 1 from the SEO section (8–15 tags, rotated within the set; never identical to yesterday).

STORY SUPPORT (M / A / E — 8 AM / 1 PM / 8 PM): M: "Aaj se yahan roz 1 skin-sach milega. Aapka skin type kya hai? (poll: oily/dry/combo/confused)" · A: Founder photo + "hum kaun hain — 15 second me" (video) · E: "30 din ka safar shuru. Follow on karo + GLOW likho DM me (list me aana ho)."

AI GENERATION PROMPT (Option A — copy-paste, character sheet in §5):

AI video, 12 seconds, 9:16 vertical, UGC handheld. Indian woman 26, [CHARACTER], at a home window in monsoon light, morning. Cut 1 (0–3s): she touches her T-zone, wipes a sheen with a tissue, looks at camera with a tired "yeh kya hai" face. Cut 2 (3–6s): close-up of her hand holding a small amber serum bottle, plain blurred label, one drop on fingertip. Cut 3 (6–12s): she dots 2 drops on face, pats gently, exhales, small calm smile. Real Indian bedroom background — window, curtain, chai glass on sill. Natural window light, soft monsoon grey-warm mix, no ring light. No on-screen text, no logo. Post-production (CapCut): frame-1 text "40° bahar, 25° andar — dono skin par alag karte hain." → mid text "Ek hi jawab: 2 drops." → CTA card 1.5s: RANGAT NATURALS — DM "GLOW". Voice: the Day-1 hook line.

HOW TO CREATE IT (tools, steps, time — free/low-cost): Phone + window, 10 min, 3 takes. CapCut: cuts every 2-3s, hook text 0-2s, CTA card last 1.5s, real VO recorded separately in a quiet corner. Stock fallback: Pexels "woman touching oily face window" — keep hands only, add your product close-up.

VISUAL / VIDEO DIRECTION: Mirror or bathroom, cool monsoon light: tired-face moment (hands/forehead only), lather close-up in palm, pat-dry. Lived-in Indian bathroom background.

OBJECTIVE: Attention + comment velocity (algorithm) + pain-point harvesting. · SALES PURPOSE: Collect real pain points → tomorrow's DM follow-ups + future content. No selling.

TARGET CUSTOMER: Women 20-35, Gujarat, oily/dull skin.

HOOK (frame 1 — spoken + on-screen text): "Gujarat me mausam dekho. Aapki skin abhi kya kar rahi hai — aapko pata hai?"

SCRIPT OR ON-SCREEN TEXT — SCRIPT: "Bahar 40 degree — oil, shine, pores wide. Ghar ka AC — tightness, dry patches. Aur dono ke beech ek look jo har mirror me dikhta hai — thoda dull, thoda 'brown'. Yeh teeno cheezein aapki skin roz saamne aati hain. Aur yeh teeno fixable hain — sahi routine se. Agle din se hum ise step by step samjhogi. Aapka sabse bada skin problem kya hai? Comment me likho — hum padh rahe hain."

ON-SCREEN TEXT: [hook] "40° bahar. AC andar. Skin beech me." → "Oil · Tightness · Dullness" → "Fixable hai. Kal se."

STORY SUPPORT (M / A / E — 8 AM / 1 PM / 8 PM): M: Tip: "Subah uthke pehli cheez: gunguna paani, nahi thanda. Kyun? (answer next frame)" · A: BTS: content shoot ka 10-sec clip · E: Question box: "Aapka #1 skin pareshani? (best 3 kal answer honge)"

AI GENERATION PROMPT (Option A — copy-paste, character sheet in §5):

AI video, 10 seconds, 9:16, UGC mirror-selfie. Indian woman 26, [CHARACTER], home mirror with round mirror light, monsoon afternoon. Cut 1 (0-3s): she looks at mirror, rubs temple, small frown — “thaka hua chehra” moment. Cut 2 (3-6s): cut to hand applying face wash lather to cheek, realistic foam. Cut 3 (6-10s): back to mirror, pats face, gives camera a “ab theek” nod. Indian bathroom background — white tile, towel, glass of water, lived-in. Natural window light, cool monsoon tone. No text, no logo. Post-production: text track “Monsoon me skin = 2 maalik: oil + thakan.” → “60-second fix, roz.” → CTA “DM GLOW · COD”. Real recorded voice: Day-2 hook.

INSTAGRAM SEO KEYWORDS (in on-screen text / caption line 1 / reel title): dull skin routine · UV window se aata hai · daily skin damage habits

HASHTAGS — Set 8 (Gujarat relatable): use ready-set 8 from the SEO section (8-15 tags, rotated within the set; never identical to yesterday).

STORY SUPPORT (M / A / E — 8 AM / 1 PM / 8 PM): M: Quiz: "UV window se aata hai? a) haan b) nahi" → reveal: haan · A: BTS: label ka 2nd version, "kyun badla?" · E: "Aapne puche 3 sawaal — video link (Reel). Aur aapka sawaal? DM."

AI GENERATION PROMPT (Option A — copy-paste, character sheet in §5):

Not an AI video — this is a CAROUSEL. Use the AI image generator for 6 flat backgrounds: "AI image, 1080x1350, cream (#F6F1E7) background, soft top light, minimal Indian home prop in corner (chai glass / towel / plant), terracotta accent, clean space for bold text, no readable brand text, realistic photo style." Then in Canva: slide 1 = hook text "5 daily skin-killers — #3 aap bhi karti ho." (big terracotta type), slides 2-5 = one killer + one fix each (UV window / touching face / hard water / no SPF indoors), slide 6 = CTA "Save karo. DM GLOW." Use your own product photo on slide 6.

HOW TO CREATE IT (tools, steps, time — free/low-cost): Canva free: master cream template → 6 slides (hook S1, one idea S2-5, CTA S6) → export 1080x1350. AI bgs: generate 6 cream backgrounds (prompt in day entry) → drop in. 25 min.

DAY 4 (Thu) — REEL, 12 SEC

#	Field	Detail
1	DAY + DATE/PHASE	Day 4 · Day 4 of 30 · Week 1 · Thu · launch-minus-17 days · Week 1 · Brand + Problem
2	PLATFORM	IG Reel → FB → (save for YT Shorts later: title "100% herbal cream kya safe hai?") (+ WhatsApp Status mirror · top-3 weeks → YT Shorts Fridays)
3	POST TYPE	Reel, 12 sec · Myth vs Reality (Education)
4	BEST POSTING TIME	8:00 PM (2nd: 12:30 PM) (Gujarat IST)
5	LOCATION (tag + SEO)	Ahmedabad, Gujarat
6	PRODUCTION METHOD	2 · AI + PRODUCT IMAGE (kitchen B-roll) · Alt: 3 · stock haldi bowl + your serum

CONTENT IDEA: "100% herbal = safe?" — the myth every Indian buyer has, attacked honestly.

FULL POST/REEL CONCEPT: Founder to camera; B-roll: generic herbal jar (no brand visible), ingredient card, hand with a drop of serum. Split-screen "MYTH / REALITY" graphic for 2 sec.

VISUAL / VIDEO DIRECTION: Kitchen counter, warm afternoon light: green paste bowl (blur), plain serum bottle beside it, hands only, slight overhead angle.

OBJECTIVE: Authority + differentiation (neither "totka-only" nor "chemical-scare"). · SALES

PURPOSE: Pre-frames Pillar 3 transparency (tomorrow's brand story).

TARGET CUSTOMER: 25-45, ingredient-curious, skeptical of both extremes.

HOOK (frame 1 — spoken + on-screen text): "'100% herbal' likha hai toh lagao? Pehle yeh sach jano."

SCRIPT OR ON-SCREEN TEXT — SCRIPT: "Myth: herbal matlab safe, chemical matlab nuksaan.

Reality: haldi, amla, koi bhi natural ingredient — galat concentration me ya galat skin par — irritation de sakta hai. Aur 'no chemicals' possible nahi bhi hai — water bhi chemical hai. Asli baat yeh hai: ingredient + concentration + aapka skin type. Teeno match kare toh herbal bhi kaam karta hai, scientific bhi. Yehi soch ke humne apna formula choose kiya. Kal: kyun exactly wahi choose kiya."

ON-SCREEN TEXT: "MYTH: Herbal = Safe" → "REALITY: Concentration + Skin Type = Key" → "H2O bhi chemical hai ☹"

CAPTION (line 1 = SEO phrase): "Aap kya check karti ho — brand ka naam ya ingredient list? Hum ingredient se shuru karte hain. #SkincareMyths #SkincareEducation"

CTA: "Follow karo — kal: humara 'Gujarati ghar' reel aayega."

INSTAGRAM SEO KEYWORDS (in on-screen text / caption line 1 / reel title): herbal = safe? · 100% herbal myth · natural skincare for indian skin

HASHTAGS — Set 2 (Vitamin C education): use ready-set 2 from the SEO section (8-15 tags, rotated within the set; never identical to yesterday).

STORY SUPPORT (M / A / E — 8 AM / 1 PM / 8 PM): M: Tip: "Herbal = safe? Nahi. Kal detail." · A: BTS: formula sheet (blurred) + "3 mahine ka kaam" · E: Poll: "Brand ka naam ya ingredient list — pehle kya dekhti ho?"

AI GENERATION PROMPT (Option A — copy-paste, character sheet in §5):

AI video, 12 seconds, 9:16, UGC handheld, founder-to-camera + insert cuts. Indian woman 26, [CHARACTER], Indian kitchen counter, afternoon window light. Cut 1 (0-4s): she holds up a small green herbal paste bowl (blur), says (lip-sync later): "100% herbal — lagao?" slight eyebrow raise. Cut 2 (4-8s): quick insert — haldi/ubtan bowl, then a plain serum bottle side by side (both plain labels). Cut 3 (8-12s): back to face, calm direct look, small hand gesture: "herbal ≠ safe. Science chahiye." Warm afternoon light, real kitchen background (spices, chai glass). No on-screen text, no logo. Post-production: text "Herbal = Safe? Myth vs reality." → "Dono ki value. Dono ka limit." → CTA "DM GLOW". Voice: Day-4 hook line (real, recorded by founder).

HOW TO CREATE IT (tools, steps, time — free/low-cost): AI video (8-12s, 3-5 takes, pick best) + real VO (founder, no face) → CapCut: real serum insert frame, text, CTA. 30 min including generation. Stock fallback: Pixabay "turmeric paste bowl" for insert only.

AI GENERATION PROMPT (Option A — copy-paste, character sheet in §5):

AI video, 15 seconds, 9:16, UGC skit — 2 characters. Indian woman 26, [CHARACTER], and her mother (AI variant: Indian woman 52, dupatta, medium-tan skin, natural texture, small bindi). Indian living room, afternoon window light, sofa, chai glass on table. Cut 1 (0-5s): daughter holds a cream bottle; mother (off-camera voice) skeptical: "Kya karta hai yeh cream?" Cut 2 (5-10s): daughter to camera, smiles: "Par nani bhi haldi ubtan lagati thi!" — mother on screen: "Haan! Wahi lagao." Cut 3 (10-15s): daughter to camera, warm: "Totke ki samajh + aaj ka science." Handheld phone feel, slight shake, natural light, real Indian home background. No text, no logo. Post-production: frame-1 text "Gujarati ghar me pehli baar 'skincare' shuru ki?" → final: "RANGAT NATURALS" + CTA "Share karo us dost ko". Real voice-overs recorded by founder + a friend as "maa" (AI video is only the B-roll of the skit; voices stay human).

HOW TO CREATE IT (tools, steps, time — free/low-cost): Best: 1 sitting with a friend/family (2-3 takes, 15 min) — real people, natural Gujarati, no face required if shot over-shoulder/hands. Alt: AI 2-character clip (labeled "AI concept", real voice-overs recorded by you + friend). 20 min.

HOW TO CREATE IT (tools, steps, time — free/low-cost): Tester shoots 2 photos on tripod (same window/chair/distance, card in frame) + 5s line. You build in CapCut: 3s Day-1 → 3s Day-14 → her line. Written consent saved. "Results may vary" on export. 40 min. No AI face, no retouch.

Post-production by RANGAT: hook text top + "@creator × RANGAT NATURALS" tag + CTA "DM GLOW".

HOW TO CREATE IT (tools, steps, time — free/low-cost): 100% creator-shot: send the brief (hook line, product in hand, 1 honest pro + 1 con, code) + you supervise via voice notes. You add hook text top + "@creator × RANGAT NATURALS" + CTA. Signed ad-use form kept. 30 min of your time.

8. STORY STRATEGY (your #1 conversion surface)

Reels bring strangers; Stories convert the 10–30% who follow — your actual buyers — because for a small account Stories feel like a relationship. Same 3 slots go to WhatsApp Status the same day (zero extra work; Gujarat buyers are heavy WhatsApp-Status users).

8.1 The 3-slot daily formula (15 min/day, batchable)

Slot	Time	Job	Format
Morning (7:00–9:00 AM)	"Roz ka 1 sach"	Value + habit	1 educational tip OR routine shot (1–2 frames) + 1 question box/poll
Afternoon (12:30–2:30 PM)	"Peeche ki kahani"	Trust/behind-the-scenes	1 BTS frame (packing, testing, workspace, a mistake) + 1 poll or quiz
Evening (7:30–9:00 PM)	"Aaj ka CTA"	Conversion	1 product/offer/review frame + DM CTA ("GLOW likho") or link sticker (WhatsApp)

Story rules:

- 3–5 frames max per slot. Frame 1 = hook (text or face/hands). Frames 2–4 = value. Last frame = engagement (poll/question) OR CTA.
- Always end the evening slot with a DM CTA or link sticker — the silent order engine (many buyers DM from Stories, not Reels).
- Reply to EVERY poll/question answer within 2 hours (DM conversation = pipeline).
- Never more than 12 frames/day. Highlights updated weekly.

9.2 Daily posting times (Gujarat IST — per content type, not one time for all)

Format	BEST	2ND BEST	Why
Reels (default)	8:00 PM (7:30-9:00 PM window)	12:30 PM	Peak evening scroll; the first 60 minutes decide distribution
Reels (product/launch)	12:30 PM	8:00 PM	Lunch = purchase browsing; D21 launch: 12:00 PM sharp
Carousels	9:00 PM	12:30 PM	Swipes need quiet evening attention; saves happen late
Stories M / A / E	8:00 AM / 1:00 PM / 8:00 PM	7:30 AM / 12:30 PM / 7:30 PM	Chai slot · lunch BTS · CTA before the 11 PM DM close
Saturday	Reels 12:00 PM · stories unchanged	—	Saturday lunch is the weekend peak in Gujarat
Sunday	Reels 11:00 AM · Q&A slot	Stories unchanged	"Aapke sawaal ka din"

Operating rules: be in the first 60 minutes (founder replies to every comment in that hour) · never delete+repost to fix a time · same 3 story slots on WhatsApp Status the same day.

How to replace with YOUR data (from Day 21): □ Insights → "When followers are most active" (top cities) ±1 hour = new anchor · □ 24-hour reach graph per post type (after 20+ posts) · □ A/B one hour per week, one variable at a time · □ DM window (7 AM-11 PM) never moves · □ re-audit monthly, write winners in the Sheet's Posting tab.

10. REEL FORMATS BY DURATION + HOW EACH IS MADE

Length	Structure	Use for	Best method	Creation time
5s	Single hook beat — one gesture, one line, one text	Pattern-interrupts, ad variants	1 (AI) or 4 (real)	10 min
8s	Problem (3s) → product reveal (2s) → promise (3s)	Quick problem→solution, texture	4 (real macro) or 1	15 min
10s	Problem → routine step → payoff	Micro-tutorials	2 (AI + product)	20 min
15s	3 cuts × 5s: hook → proof → CTA	The workhorse — default	4 or 5	20–30 min
20s	4 cuts: hook → 2 proof beats → CTA	Q&A rapid, 3 mistakes	2 or 4	30 min
30s	5–6 cuts, story arc	Founder VO story, testimonial, launch, B/A	4 or 5 (human, real)	40 min

Rules: hard cap 30–45s product/education, 60s max stories · first 2s = spoken hook + on-screen text + product/hand movement · 5s/8s reels are the ad-testing factory (generate weekly, test in Meta, shoot the winner real) · B/A and testimonial reels are always method 4/5 (real, never AI).

The 6 face-free templates (shoot these when you have nothing to shoot): 1. Hook cut (7s: one line VO → product shot → CTA) · 2. Texture reel (8–10s macro ASMR) · 3. Myth flip (10s: myth VO → "Nahi." → fact with one prop) · 4. Story clip (10–15s honest BTS + 3 VO lines) · 5. Unboxing (12–15s, customer or you — hands) · 6. Quote card + B-roll (10s: real customer line over soft B-roll).

11. FREE CONTENT SOURCES + HOW TO AVOID COPYRIGHT PROBLEMS

ONLY these platforms (free licensed, commercial use without attribution — still re-check the specific clip's license, 30 seconds):

- Pexels (video + photo) · Pixabay (video + photo + illustration) · Unsplash (photo)

The 5 copyright rules:

1. NEVER download from Instagram, TikTok, YouTube, or any other brand's content — no matter how "inspired" you are. Watermarked clips are not free. Reposting IG content = account BAN risk + takedown.
2. NEVER present stock as your product, your customer, or your factory. Stock = B-roll and background only. Your product is always the real bottle/box; your "founder voice" is your real voice.
3. ALWAYS add your own layer: your voice-over + your text overlays + your product close-ups + your edit. Stock clip + your hook text + your product = an original post. Stock clip alone = not yours.
4. Faces: prefer hands/texture/objects shots — they blend better and avoid uncanny faces next to your product.
5. AI-generated "customers" are forbidden (Section 1, rule 4). Real customer = real person, on camera, with written consent.

Stock search-term bank (copy these searches):

Need	Search terms
Oily face / shine	"woman touching oily face window" · "wiping face towel"
Washing face	"woman washing face bathroom" · "face wash foam hands"
Applying cream/serum	"woman applying cream face" · "skincare hands close up" · "lotion on hand"
Sunscreen	"sunscreen on hand close up" · "woman applying sunscreen"
Morning/night routine	"morning routine woman bedroom" · "night skincare lamp"
Kitchen / chai	"chai glass table" · "masala chai" · "indian kitchen morning"
Family warmth	"indian mother daughter kitchen" (B-roll only; voices = real people)
Unboxing / packing	"unboxing hands parcel" (hands only) · "kraft box packing hands"
Texture / liquid	"oil drop slow motion" · "liquid texture macro"
Mirror mood	"mirror selfie woman bedroom"

The phone workflow (your studio is a window): light = face a window, 9-11 AM or 3-5 PM (night content: one warm lamp) · stability = ₹500 tripod, eye level, same distance for B/A (20-30 cm) · 4 angles = face-level / hands close-up / over-shoulder / top-down flat-lay · audio = record VO separately in a quiet corner · 3 takes per shot (take 2 is almost always best) · export 1080×1920 (9:16) or 1080×1350 (4:5).

12. CAROUSEL SYSTEM (2 per week — the save + search engine)

Carousels rank in IG search, get re-swiped, and pin in Highlights. 4:5 (1080×1350) · one master cream/terracotta template (Canva) · 1–2 photos per slide max · keyword in slide 1 + caption line 1 · CTA slide always has ONE action · save to the matching Highlight within 24h.

20 more carousel ideas (Reference Library R6) cover: SPF math, patch test SOP, skin-type 101, oily/dry skin truths, monsoon checklist, wedding-glow 6-hafte plan, Diwali gift guide, night routine, morning 60-sec routine, FAQ 10, "hum kya NAHI karte", ₹600 ki math, 2000 vs 500 ingredient list, safe-order 4 sawaal, Gujarat saal ka plan, college student edition, 3 gifting tiers, 4-hafte program week-by-week, review wall.

13. GENUINE BEFORE/AFTER (the only kind you will ever post)

Before/after is the highest-converting asset in skincare — and the fastest way to die under ASCI/Consumer Protection rules if faked. RANGAT's rule: we do not show "before/after". We show "Day 1 and Day 28" — with the receipts.

1. Real testers, real product, real time. 20-tester × 4-week program before launch. No stock, no AI faces, no actors-as-customers.
2. Written consent, kept on file. Consent lapses → content comes down.
3. Same everything: same window light, angle, distance, phone · no filter, no retouch · printed "Day 1 — RANGAT 4-hafte program" card in BOTH frames.
4. Disclosed on every frame: "Day 1 → Day 28 · 4 hafte · Results may vary" — never cropped in the ad version.
5. Show the boring middle: the Day-7 "abhi toh shuru hai" frame is REQUIRED.
6. 1 honest negative per 3 positives ("18 continue, 2 nahi — dono ki baat suno").
7. Safe language: "dikhna kam karta hai" · "help karta hai" · "4-6 hafte ka honest timeline" — never cure/remove/khatam/100%.
8. Frequency: first B/A = D17 (pinned + ad cut) · then 1-2/week from the real pool.

Consent template (keep with the photos):

Main RANGAT NATURALS ka [product] [dates] ke beech use kiya/ki. Yeh photos meri asli photos hain (same light, bina filter). RANGAT inhe Instagram, website aur Meta ads me use kar sakta hai, saath me "Results may vary" likha hoga. — [Naam, city, date]

The 4-week documentation SOP (per tester): Day 1: consent + photo + skin-type note · Day 7: photo + "kya dikh raha hai?" message (expect "kuch nahi" — that is the honesty) · Day 14: photo + 2-line update · Day 28: photo + full update + review request. One tester = 4 reels + 1 carousel + 10 story frames.

14. UGC SYSTEM (20 scripts + pipeline + consent)

UGC = real people, real words, real rooms. It is the trust engine AND the ad inventory (UGC runs $\approx 2\times$ brand creative in ROAS).

14.1 The 20 UGC scripts (RANGAT's bank — full versions in Reference Library R8)

1. Girl creator, Ahmedabad, 24 (Gujarati): "Gujarat me monsoon — chehra dull, phir 40 degree. Main kiya? Bas 2 cheezein." — 2-hafte update, honest.
2. Male professional, 28 (Hindi): "9 baaje jaata, 8 baaje aata — par 2 minute nikalta hoon." — Face Wash, SG Highway dhool.
3. Gen-Z college, 20: "Exam season + outdoor classes = tan-look + dullness. Pehli baar serum — budget ke andar." — ₹600 value line.
4. Professional woman, 30, Ahmedabad: "30 ki umar — skincare ab 'maintain' hai. Meri 6:45 routine." — 3 steps, 10 minutes.
5. Bilingual creator, 25 (Gujarati-first): nani-ke-totke + science bridge — the positioning skit.
6. Skincare-niche creator, 27 (30k+): ingredient-list read — "10% kyun, hum khud padh ke bataati hain."
7. College girl, 19, Surat: hostel sink, chai break me 2 minute — budget + honesty.
8. Male college, 21, Vadodara: "Vadu wale bhi skin" — light humor, Face Wash.
9. New mom, 28, Rajkot: "Maternity me skin" — gentle routine, 2 drops.
10. Couple, 27/29, Ahmedabad: "Mere liye serum, uske liye face wash" — gifting angle.
11. Beauty shelf creator, 26: shelf reset — sirf 4 cheezein (bathroom minimalism).
12. Gen-Z POV, 21: "POV: pehli baar serum" — the beginner POV.
13. Young professional, 26, Surat: 9-to-9, 60-second skin — routine integration.
14. Cultural-fest creator, 20, Vadodara: "Shaadi se pehle 6 hafte" — wedding-glow seed.
15. Girl creator, 24, Rajkot (Gujarati+Hindi): value-first — "2000 wali afford bhi nahi, chahiye bhi nahi."
16. Skincare educator, 29: "Layering order — 60 sec" — education with her voice.
17. Comedy creator, 23: "Maa: cream kya hai?" — the share machine (script from Section 7, D5).
18. ASMR routine, 25: 60-second morning routine, mostly visuals — the save magnet.
19. Quiz creator, 27: "Aapka skin type kya hai? 3 sawaal" — interactive.
20. Challenge OPENER, tester, 26: "7 din, 3 steps, roz 6:45. Day 7 pe wapas aao." — the long-tail asset.

Structure for all 20: hook (her words) → Scene 1 (real room, real time) → Scene 2 (product in routine, real label) → Scene 3 (honest update — one small negative included) → product shot 3s (label readable) → CTA "DM GLOW" (text) + spoken COD line.

14.2 UGC operations rules

- Consent + ad-use before publishing: "Main RANGAT ka [product] use kar raha/hoon [dates], apni asli experience ke saath. Video IG + Meta ads me use kar sakte ho. — [Name, city, date]" — saved with the file. No paper, no ad.
- 4 hard brief rules: no medical claims · no "cure/remove/permanent" · "results may vary" on any B/A · no fake urgency.
- Compensation (in writing): product free + flat fee by tier (5-10k → ₹500 · 10-25k → ₹1,000 · 25-50k → ₹1,500-2,000) + 20% affiliate on their code (first 20 sales) + ₹100 per Meta ad-use (stated).
- 1 shoot = 6 assets: 1 feed reel + 3 story frames + 1 quote card + 2 ad cuts (15s + 30s).
- Pipeline (9 steps): get content → paper trail → 3 cuts → ad layer (hook text top, brand tag, CTA card, her real voice) → feed sales campaign as creatives #5-8 → 7-day window, rank by ATC cost → winners +30%/48h → promote to retargeting → log in the Sheet. Refresh: 2 fresh sources every 2 weeks.

- Bank target: 40-60 assets by Day 90 (20 creator + 15 customer + 15 self-shoot + 10 AI-labeled concept).

15. MICRO-INFLUENCER STRATEGY (Gujarat-first)

15.1 Who to contact & follower range

- Sweet spot: 5k-50k (reach is real, price is low, audience trusts them more than mega-creators). Nano (1-5k) for volume + local authenticity; micro (5-50k) for the core engine.
- Categories in order of fit: food/lifestyle Gujarati creators → college/influencer (Ahmedabad/Surat) → beauty/skincare local → fashion (wedding season) → male lifestyle (Face Wash wave).
- Gujarat-first selection: start with Ahmedabad + Gandhinagar (home base), then Surat, Vadodara, Rajkot in the city waves. Commenters in Gujarati = real local audience.

15.2 Where to find them (2 hours/week, Wednesday slot)

1. IG search: #Amdavad #Ahmedabad #Gujaraticreator #Amdavadi #Gujaratfood #Surat #Vadodara #Rajkot + skincare tags + location
2. Explore page from 5 known local accounts
3. YouTube: "Ahmedabad vlog" (their cross-posts)
4. Local wedding vendors' tagged photos (gold for Oct-Feb)
5. Your own 20-tester pool — every tester with >1k followers is a nano-creator pipeline

15.3 Engagement quality (vetting, 15 min each — sales > followers, always)

- ER = (likes + comments) ÷ followers on last 20 posts → target >4%. 8k with 450 likes/post beats 100k with 300.
- Comment quality: real people commenting in Gujarati/Hindi = real local audience; bot comments = walk.
- Audience location: open commenters' profiles — Gujarat/West India match your ad geo.
- Past brand posts: zero brand content in 50 posts = your collab will look native (a plus).
- The DM test: a real creator answers with questions; ghosts = deprioritize.
- Hard no: medical claims in her history, fake giveaways, brand-damage flags.

15.4 Barter vs paid — the RANGAT ladder

Tier	Deal	When
Barter (product-only)	Free product + honest review, no obligation	testers, nanos, first touch — volume
Gifting	Free product + "if you naturally talk about it, that's our biggest help"	>1k local nano-creators
Paid collab	₹500/₹1,000/₹1,500-2,000 by tier + 20% affiliate (first 20 sales) + ₹100 per ad-use	creators who engage + vet well
Affiliate-only	Unique code, 20% per sale (₹120+/order), monthly payout, product free (1 unit, then 1 per 10 sales), no posting obligation	higher creators / long-term partners
UGC-only	Paid clip (₹500-1,500) + ₹100/ad-use, no her-audience obligation	scaling the ad bank fast

Sample strategy: every creator gets the real product first (never a "sample-only" no-cost expectation on paid tiers) + the 4-hafte program access so their updates are real (Day 1/14/28 = 3 free content moments).

15.5 Outreach message (copy-paste; personalize line 1 with their actual post)

"Hi [Name]! [Specific post reference — 'aapka aaj ka reel dekha, Amdavad ka vibe perfect tha']. Main [Name], RANGAT NATURALS ki founder — Gujarat ka ek naya skincare brand. Humne [city] me 20 testers ke saath 4-hafte ka program chala hai. Aapko hamara Vitamin C Serum bhejna chahte hain — bilkul free, koi script nahi. Aapki honest baat (achhi bhi, kami bhi) — aur agar pasand aaye toh ek chhota sa compensation + affiliate code. Kya aap try karne ke liye sochenge? — [Name], RANGAT NATURALS"

Follow-up (48h, once): "Short version: free Vitamin C Serum (₹600 value), koi script nahi, sirf honest review. Agar nahi chahiye toh 'na' bol dijiye, main respect karungi. Agar haan — bas WhatsApp number bhej dijiye."

15.6 The UGC brief + creator script (send with the product)

Brief (the 4 rules + deliverable): 1 Reel 15–45s, her style, her room, her light · hook line (her words, from the R8 bank) · product in hand with real label visible · 1 honest pro + 1 honest con · CTA: her code + "DM GLOW" · 4 hard rules (no medical claims / no cure words / "results may vary" on B/A / no fake urgency) · deliverables: 1 reel + 3 story frames + written ad permission.

Creator script skeleton (she fills, you don't write it for her): 3s hook (her words) → 5s product in routine (real label) → 5s honest take ("achhi baat: ... · kami: thoda tight pehle din") → 3s verdict → 2s "Mera code: [CODE] — DM GLOW pe bhi hota hai, COD hai."

15.7 Tracking system (Sheet "Creators" tab)

Name · city · followers · ER (computed) · stage (shortlist/contacted/sent/live/paid/long-term) · terms · code · content dates · content performance (views/saves/code sales) · ad performance (spend/ATC/CPA/ROAS per her creatives) · consent file link. Sunday review: contacted/accepted/live/code sales/creator-creative ROAS vs brand (target $\approx 2\times$)/cost per asset ($< ₹800$).

Unique codes: every creator + every referring customer gets a code (CREATOR: `NAAM10` · CUSTOMER: `GLOW+name`) — tracked in the Sheet, 20% commission on creator codes (first 20 sales), ₹100/₹100 on referral codes.

15.8 Turning successful creators into long-term partners

1. After 2 good posts → the partner conversation: "Aapki 2 reels humari top-3 performance me hain. Ab 90-din ka partnership: 2 reels/mahina + monthly payout + first access to har naye product + aapka naam 'RANGAT 4-Hafte Partner' ke roop me highlight me."
2. The partner gets: recurring fee (not per-post race), 30-day ad rights (vs 30), first access to waves (Sunscren D45, Night Cream D75), a featured spot in the REVIEW/FOUNDER highlights, and the "IC-20: 90 Din Update" concept (she returns at day 90 with real results — the strongest proof asset you will own).
3. Kill criteria (kind, in writing): ER collapse, medical-claim slip in a brand post, fake-urgency use — one written warning, then off the program.
4. Target: 3 creators live by D19 → 6 by D45 → 10+ cumulative by D90, of which 3–5 are paid partners (60% Gujarat / 40% other cities from D60).

16. META ADS FROM ZERO (exactly when, what, how much)

16.1 When: the CEO call

1. A new cosmetics brand with zero reviews running cold ads on Day 1 = paying ₹150-300 per "hmm, who is this?" that never converts. Indian skincare prospecting CPMs are already high (₹100-260).
2. A new account with no content history gives Meta no relevance data — the algorithm has nothing to optimize toward.
3. BUT waiting 90 days wastes the launch window (Oct-Feb = wedding/Diwali). So the plan: organic-only Days 1-14 → optional ₹200/day boost Days 15-20 (only on the ONE organic-validated reel, cap ₹300) → full ads from Day 21 (LAUNCH) at ₹500/day.

What must be organic first (Days 1-14): the whole trust layer — 14 posts, the 30-day story start, the first 100-200 followers, the first 20-40 GLOW DMs, and at least ONE reel with saves+shares ÷ reach > 8% (that is the only reel you boost).

16.2 The 5 campaigns (each with objective → stop rule)

SUCCESS METRIC	CPC $\leq$ ₹15 · chat opens >50% · lead cost $\leq$ ₹60
WHEN TO SCALE	CPC $\leq$ ₹12 + DM script converting → +30%/48h
WHEN TO STOP	chat→DM conversion <20% (fix the DM funnel first — the ad is not the problem)

CAMPAIGN 4 — SALES / CONVERSION ("GLOW PROSPECT" — the engine)

Field	Spec
OBJECTIVE	Sales → WhatsApp Messages (India's COD reality: the sale happens in DM)
AUDIENCE	Ad Set A: BROAD Ahmedabad + radius, 18-45, no interests · Ad Set B: INTEREST Gujarat + West India, 18-35 women (skincare/beauty/D2C/Amazon)
LOCATION	Ahmedabad + 60 km (incl. Gandhinagar) from D21 → +Surat W4-6 → +Vadodara W6-8 → +Rajkot W8 → top-6 India cities D90+ (kill any city >1.3× Gujarat CPA)

WHEN TO SCALE	+30%/48h while $CPA \leq 1.2 \times$ target; add the next city at its wave; never double in one jump (resets learning)
WHEN TO STOP	Creative fatigue: CPM +30% / CTR -25% / CPA +50% → rotate creative. Never stop the campaign while CPA is under target.

CAMPAIGN 5 — RETARGETING ("RECOVER" + warm LAL)

Field	Spec
OBJECTIVE	Sales → WhatsApp (retargeting stack)
AUDIENCE	R1: IG engagers 30d · R2: product viewers 30d · R3: video viewers 50%+ 30d · R4: WhatsApp leads who didn't buy 14d · R5: add-to-cart 14d · R7: bio visitors 14d · (D35+) C2: 1% lookalike of purchasers

HEADLINE	"Batch 1: X seat left (real count)"

TESTING PLAN	3 audiences × 2 creatives, 7 days, scale whichever $CPA \leq ₹150$
SUCCESS METRIC	$CPA \leq ₹150$ · frequency $\leq 3-4/wk$ · ROAS 2.8-4.5× (warm audiences)
WHEN TO SCALE	winner +30% up to the 25% cap
WHEN TO STOP	frequency $> 4.5/wk$ or CTR $< 0.8\%$ → rotate creative. Never fully stop — this is the profit engine.

Sequencing: D21 C4 ₹500 → D25 C5 ₹200-300 → D30 C3 traffic ₹100 → D35 C2-LAL inside C5 → D60 C4 SCALE (Advantage+, +6 India cities, ₹1,000) → D90 full engine ₹2,000-5,000/day.

16.3 The budget plans (₹ per day, CPA-gated)

Plan	When	Allocation (per day)
₹300	D15-20 boost window (default ₹200, cap ₹300) — or post-launch lean if cash-tight	Awareness/boost: 1 validated reel, Gujarat+interest, 3-day windows. Lean variant: C4 ₹200 + C5 ₹50 + C3 ₹50
₹500	D21 launch	C4: Ad Set A broad ₹300 + Ad Set B interest ₹200 · 4 creatives · WhatsApp objective
₹1,000	D35-59 (proof phase)	C4 ₹500 + C5 retargeting ₹300 + C3 traffic ₹100 + C2 engagement ₹50 + C1 awareness ₹50
₹2,000	D60+ (scale phase; seasonal peak to ₹5,000 only after 2 straight weeks $CPA \leq ₹300$)	C4 SCALE ₹1,000 + C5 ₹400 + C2-LAL ₹300 + C3 ₹200 + C1/C2 awareness-engagement ₹100 (retargeting share = 20% ✓)

Rules for every plan: scale in +30% steps every 48-72h while $CPA \leq 1.2 \times \text{target}$ · kill creative at CPM +30% / CTR -25% / CPA +50% · retargeting $\leq 25\%$ of total · targets: $CPA \leq ₹300$ M2 → $\leq ₹250$ D90 · ROAS $\geq 3 \times$ D90 · the LTV math (repeat 10-15% by D60 + referral) makes a ₹300 CAC viable.

16.4 AI-made ad creatives (no founder face — ready to produce)

Ad A — "Texture Promise" (method 2: AI + product image): 8s macro: drop → spread → absorb (prompt \$4.5) + real bottle insert + text "4-6 hafte ka honest timeline" + CTA card. Primary text: "Texture dekho. Halka. Jaldi absorb. 4 hafte baad aap khud judge karo — COD hai, pehle dekho phir paisa do. — RANGAT NATURALS" · Headline: "Vitamin C 10% · COD · 2-4 din (Gujarat)" · CTA: Send WhatsApp Message.

Ad B — "Myth Flip" (method 2: AI creator, labeled "AI concept" + real product insert): 12s: "100% herbal likha hai toh lagao? Yeh sach jano." → haldi bowl (stock) vs serum (real insert) → "Herbal ≠ safe. Science chahiye." Primary text: "Hum 'anti-Ayurveda' nahi, 'anti-blind-totka' hain. 20 testers, 4 hafte, honest photos. COD + batch card har box me. — RANGAT NATURALS" · Headline: "20 testers · 4 hafte · disclosed" · CTA: Send WhatsApp Message.

Ad C — "COD Explainer" (method 4: real hands + box): 15s: 3 steps on screen — "1. GLOW likho (1 min)" → "2. Parcel 2-4 din" → "3. Kholo, dekho, phir paisa do." + real packing footage. Primary text: "Pehli baar naye brand se? Yehi karo: pehle dekho, phir paisa do. COD · free shipping (launch) · free Face Wash mini. — RANGAT NATURALS" · Headline: "Pehle dekho, phir paisa do" · CTA: Send WhatsApp Message.

Ad D — "4 Hafte" (method 4/5: real tester, consent): Day-1 card → Day-28 card → her 5s line. Text ALWAYS: "Day 1 → Day 28 · 4 hafte · Results may vary". Primary text: "Same light. Same angle. 4 hafte. Aap khud judge karo. — RANGAT NATURALS" · Headline: "Real results · disclosed · consent" · CTA: Send WhatsApp Message.

16.5 Gujarat-first advertising → India

City	Wave	Ads from	Creative angle (local hook)	Kill rule
Ahmedabad + Gandhinagar (metro cluster, home base)	Home	D21	Hard water, 40° summers, chai+thepla, SG Highway dhool, college life, "Amdavad wale"	baseline — never killed
Surat	Wave 2	W4-6 (after Ahmedabad CPA known)	"Diamond city hustle" 9-to-9 + glow · student budget · 2-minute routine	city CPA >1.3× Gujarat
Vadodara	Wave 2	W6-8	Wedding-glow season · colleges · light "Vadu" humor	city CPA >1.3× Gujarat
Rajkot	Wave 3	W8+	Dry winters (face cream wave) · family gifting (maa/nani) · "Rajkot walo"	city CPA >1.3× Gujarat
Top-6 India cities (Mumbai, Delhi NCR, Bengaluru, Pune, Hyderabad, Kolkata)	National	D90+ (C4 SCALE)	"Indian skin" creative — NEVER "Gujarat only" nationally	pause city 2× worse, 1 week to recover

How India expansion actually happens: winning content (top-3 CTR/ROAS creatives) + winning product (VC → Sunscreen) get the Advantage+ budget; geo unlocks city-by-city; the proof story travels — "Gujarat me 20 testers, 100 pehli customers — ab India ke saath" is a STRONGER national story than a brand that never had a home.

17. THE COMPLETE SALES FUNNEL (what content lives at each stage)

REEL/POST → PROFILE → TRUST → PRODUCT → WEBSITE/WHATSAPP → PURCHASE → REVIEW → REPEAT PURCHASE → REFERRAL

Stage	What happens	Content that does the job	KPI target
1 · Reel/Post	Hook stops the stranger; SEO makes it findable	Problem/relatable/curiosity reels + keyword on-screen text (20/25 of feed)	>50% views from non-followers
2 · Profile	The 3-second test (bio + pins + highlights)	Exact bio (category → product → COD → GLOW) · 3 pins (buy/trust/who) · RESULTS highlight first	10–15% of reel viewers → profile
3 · Trust	Evaluators decide "safe ya nahi"	RESULTS highlight (disclosed B/A, reviews) · D22 "4 darr, 4 jawaab" · batch card content · "1 bhi fake review nahi" line	saves + profile time
4 · Product	What to buy + how	Hero pin (D8/D21) · texture/how-to reels (D9/D16) · "box me kya hai" (D27) · product keyword reels	product interest
5 · Website /WhatsApp	The bio link (3 items, WhatsApp first)	COD explainer (C9 carousel) · "GLOW" quick reply · 15-min SLA auto-reply	25–40% of profile visits → chat
6 · Purchase	GLOW 5-step DM script → COD order	The script (below) + one proof asset in the 2nd DM + TRUE scarcity (real seat count)	DM→order 25–40% (launch) → 35–45% · COD fail <15%
7 · Review	D1/7/14/28 WhatsApp touches + review request	"Aaya? Khol diya?" (D1) · "Koi redness?" (D7) · "Kya dikh raha hai?" (D14) · "Photo bhejo + 1 line" (D28)	25–35% of orders → review
8 · Repeat purchase	Wave-2 offer to purchasers (retargeting R6)	"Aapne serum liya — ab SPF" (D45–60) · night cream waitlist (D75) · gifting (Oct–Dec)	10–15% repeat by D60
9 · Referral	D29 launch: do ₹100, lo ₹100 (codes)	Referral reel (D29) + 3-frame story + code card	10–20% of orders by D60

The GLOW 5-step DM script (15-minute SLA, every DM):

1. Greet + answer (0–2 min): "Namaste! Vitamin C Serum 10% — ₹600 (launch me free Face Wash mini + free shipping). COD hai. Aapka skin type kya hai — oily/dry/combo?" (a question first = conversation, not chatbot)
2. Qualify + reassure (2–5 min): kill the #1 fear (fake? result? time?) with batch card + COD + 4–6 hafte honest timeline + one proof asset attached.
3. Close (5–10 min): "Aaj order karo toh launch me free Face Wash mini + free shipping. Aapka naam + city + WhatsApp number?" + written order confirmation.
4. After order (same day): WhatsApp confirmation + "parcel 2–4 din" + care card.
5. D1/7/14/28: the review-ask sequence (stage 7).

Reviews = the product of the funnel: every review becomes a quote card (story + highlight), a testimonial reel (D26 format → ad creative), and a retargeting asset. The 20-tester program is the pre-launch version of the same machine.

18. ANALYTICS — WEEKLY METRICS + THE 6 DIAGNOSTIC PLAYBOOKS

18.1 The weekly KPI board (Sunday, 45 min — 3 decisions max: scale / kill / fix)

Metric	Where	Target (Months 1-3)
Followers	Sheet ⑥	100 (D7) · 500 (D21) · 1,000 (D45) · 5,000 (D120)
Reel reach (non-follower share)	IG Insights	>50% from non-followers
Saves + shares per reel	IG Insights	Saves: education >8% · Shares: relatable >3%
Profile visits	IG Insights	10-15% of top reel's reach
Link clicks → WhatsApp chats	WA/insights	25-40% of profile visits
GLOW DMs	WhatsApp log	600-1,000 total by D30
DM → order	Sheet ①	25-40% launch → 35-45% steady
Orders	Sheet ①	80-100 by D30 · 400-500 by D60 · 900-1,200 by D90
COD failure	Courier data	<15%
Review rate	Sheet ①	25-35% of orders
Repeat (D60 cohort)	Sheet ①	10-15%
Referral share	Sheet ①	10-20% by D60
Ads: CPM / CTR / ATC / CPA / ROAS	Meta + Sheet ④	CPM ₹100-260 · CTR 1.2-2.5% · CPA ≤₹300 M2 → ≤₹250 D90 · ROAS ≥3x D90
UGC bank size	Sheet ③	+5 assets/week · 40-60 by D90

18.2 The 6 diagnostic playbooks (symptom → exact action)

1 · LOW VIEWS (reel <500 reach after 24h, 3+ reels in a row): check the 3s-hook (spoken + text + movement in frame 1?) → rewrite hook (different style, never same twice) · check watch time: <3s = hook failed; 6-12s drop = dead middle (add pattern interrupt at 2-5s, new visual every 5-7s) · check posting time is inside the current best window · check format variety (same format 3× in a row? rotate) · after 3 failed rewrites: kill the topic, take the next from the hook log.

2 · HIGH VIEWS, NO SALES: you reached non-buyers or there is no purchase bridge. Does the reel say WHAT to buy + PRICE + COD + ONE action? If no → add a 2s bridge before the CTA ("agar aap oily skin wali ho — DM GLOW, COD hai") · re-run the 3-second profile test (bio line 2 = product; pins = buy/trust/who; RESULTS first) · check the DM line was alive in the viral hour (15-min SLA) · check the OFFER highlight has the current offer · verdict: views without sales = awareness spend — fine for 2 reels/week, if 4+ shift the mix to Trust + Conversion.

3 · HIGH SAVES (>8% of reach): you are the "smart brand" — the moat is building. Turn every high-save carousel into a 45s voice-over reel · name the series ("Skin 101 #8") so the search shelf compounds · saved topics → next month's keyword Reels · retarget savers (C5) with proof creatives (savers = evaluators).

4 · HIGH SHARES (>3% of reach): you are the share machine (relatable content). Double the relatable format for 2 weeks · every 3rd relatable reel ends with a 1-line product bridge or it never converts · check who shares (Gujarat circle = local wave working; outside Gujarat = tag it for C4 city selection) · pin the top share reel to Pin 3 if it carries the brand story.

5 · HIGH PROFILE VISITS, LOW LINK CLICKS / GLOW: the profile leaks after 3 seconds. Sit on your own profile for 30s as a stranger — what do you NOT understand? Fix ONE thing per week: bio line order → highlights (RESULTS first) → pins (buy/trust/who) → link (WhatsApp first, 3 items max) ·

OFFER highlight has the current offer · add a pinned profile story: "Naya yahan? Yeh 3 pehle dekho" (results → how to order → COD).

6 · HIGH LINK CLICKS, NO PURCHASES: the shop floor leaks. Re-read 10 dead chats (Sat block) and find the stall: price? trust? timing? fear? · price → "20 chai, 4 hafte" value frame + COD-first phrasing ("paise parcel ke baad") · trust → batch card photo + B/A story link in the 2nd DM (conversation first) · timing → auto-reply + "15 min me reply" must be there · "soch lu" → one soft-close per chat with TRUE urgency ("aaj order karo toh free FW mini + free shipping — launch window hai. Kal se sirf serum.") · measure DM→order weekly; <25% = the script (Section 17) is not being followed.

19. THE 30/60/90-DAY SOCIAL MEDIA GROWTH PLAN

Phase 1 — "THE 100" (Day 1-30): prove the machine works

Aspect	Plan

Phase 2 — "THE 500" (Day 31-60): add the second engine (Sunscreen)

Aspect	Plan
Content	Wave 2: Sunscreen hero (40% of content: SPF education, "baarish me sunscreen?", reapply, no white cast) + VC cohort #2 proof + wedding-glow (Oct-Feb)
Posting	Same clock — now from YOUR Insights data (A/B hour test done D21-45)
Stories	3 slots continue; evening CTA rotates: sunscreen waitlist (W5) → unboxing reposts (W6)
Creators	+Surat (W4-6) +Vadodara (W6-8) · 2 paid partners · 30 UGC by D60 · UGC→ads pipeline feeding C4 #5-8
Ads	C2-LAL live D35 · C4 SCALE live D60 (₹1,000, +6 India cities) · total ₹1,000-2,000/day · CPA-gated +30%/48h
SEO	Sunscreen keyword Reel (dedicated) · "no white cast sunscreen" + "spf 50 india" own the shelf · long-tail Shorts 3/week · first monthly audit from real data
Sales	Wave-2 offer to ALL purchasers (C5 R6: "aapne serum liya — ab SPF") · COD steady · gifting pre-warm (Oct)
KPIs	400-500 cumulative orders · 3,000+ followers · CPA ≤₹300 · repeat 10% of D1-30 buyers · ROAS trending to 2.5x · 30 UGC banked

Phase 3 — "THE MACHINE" (Day 61-90): scale + Diwali + Night Cream

Aspect	Plan
Content	Wave 3: Night Cream (D75-90) + Diwali gifting boxes (100+ target, code GIFT) + 3-cohort B/A bank. Mix: 35% night/Diwali, 30% proof, 20% sales, 15% founder
Posting	Same clock + 2 Diwali countdown reels/week (Nov)
Stories	Countdown engine (Diwali box, Night Cream launch) · "Day X of 90" progress Sunday · UGC repost slot daily (bank 40-60 deep)
Creators	60/40 Gujarat-rest map · 3-5 paid partners · IC-7 (workspace tour) + IC-9 (Diwali) live · 40-60 UGC assets

Aspect	Plan
Ads	Full engine ₹2,000–5,000/day (16.3 plans) · retargeting 15–25% · freq ≤3–4/wk · seasonal peak only after 2 weeks CPA ≤₹300
SEO	Monthly audit drives 30% of next month's content · keyword Reel per product (VC + SPF + Night) · "ahmedabad skincare brand" local shelf owned · drop generic hashtags at 10k
Sales	Referral at 10–20% of orders · repeat 10–15% · COD fail <15% · Night Cream launch offer (cap 100 again — the "100" ritual is the brand's heartbeat)
KPIs	900–1,200 cumulative orders · 5–8k followers · ROAS ≥3x · CPA ≤₹250 · LTV:CAC ≥2.5 · Diwali boxes 100+ · 40–60 UGC banked

Day-90 verdict test (1 hour, written): orders on track? CPA ≤₹250? UGC bank 40+? Repeat 10%? Referral live? 4 of 5 → scale budget one step + 1 full-time editor. ≤3 → fix the leaking stage (Section 18 playbooks), no budget step.

The loop after 90: every 30-day block re-runs the calendar template with (a) the current wave product, (b) the current city wave, (c) the current season — same fields, same discipline, fresh hooks from the top-10 rewrites.

20. COMPLIANCE RED LINES (the 8 non-negotiables)

1. No fake reviews, testimonials, or results. Every review = real customer, on camera or in writing, consent on file. "Humari page pe 1 bhi fake review nahi" is both a promise and a policy.
2. No fake before/after. Only the disclosed "Day 1 → Day 28" format (Section 13) — same light, card in frame, "Results may vary" on every export.
3. No fake followers or fake engagement. No buying, no follow-back farms, no engagement pods. The 80–100 orders target is real DMs from real reels.
4. No guaranteed results, no medical claims, no "cure / remove / permanent / 100%". Safe language: "dikhna kam karta hai" · "help karta hai" · "4–6 hafte ka honest timeline".
5. No unverified claims. If it is not on the formula sheet or the 20-tester report, it is not on the label or in the reel.
6. No downloading copyrighted content — including from Instagram. Free licensed stock only (Pexels/Pixabay/Unsplash) as B-roll, with your own edit/voice/branding on top (Section 11).
7. No misleading ingredient or price claims. "10% Vitamin C" = the formula's 10%. "Sasta" is never a claim; "value" is explained (20 chai, 4 hafte — the real math).
8. AI is labeled and never impersonates customers. AI = concept/teaser/B-roll with "AI concept" label; real customers are real humans with written consent.

SAFE vs UNSAFE — the 30-second check before any post ships:

SAFE	UNSAFE
"Dark spots ka dikhna kam karta hai (4–6 hafte, regular use)"	"Dark spots khatam, 100% guarantee"
"Tan-look fresh dikhane ke tips"	"Tan hamesha ke liye remove"
"Aapki skin pe result alag ho sakta hai — Results may vary"	"Sab pe aisa hi result aayega"
"20 testers, 4 hafte, honest photos (disclosed)"	Stock/AI "customer" photos
"COD — pehle dekho, phir paisa do"	"Limited stock!" (when it is not true)
"Hum manufacturer nahi hain — formula chuna, 20 aahaiyon pe test kiya"	"Our factory/lab" (you are not a manufacturer)

The final rule: when in doubt, show the receipt (batch card, consent file, tester photo) — or don't post it.
