RANGAT NATURALS — Social Media Execution Master Guide

How to use this book: This is not a strategy deck. It is your operating manual. Section 2 gets your Instagram ready on Day 0. Section 4 tells you what to post, when, with which words, and with which AI prompt or free manual method — for all 30 days. Sections 5-12 are the systems. Sections 13-24 run the machine for 90 days. Work it top to bottom, then live in Sections 4, 11, 19, 21 and 23.

The North Star (read this before every decision)

Main goal: CUSTOMERS + SALES + REPEAT + PROFIT. Not likes. Not followers. Not "viral." Every post must survive this question: *which stranger will this make buy, and how will they buy (DM "GLOW" → WhatsApp → COD)?* If a post has no job in that chain, it does not get posted. Vanity metrics are tracked (they matter as fuel), but they are never the goal.

Ground rules (non-negotiable, from the CEO verdict):

- No fake reviews, fake testimonials, fake before/after, fake followers or fake engagement — ever.
- No guaranteed results, no "cure / permanent / 100%" claims, no medical claims, no unverified claims.
- No downloading copyrighted content or Instagram content — free legally-usable stock only (Section 7).
- RANGAT NATURALS is a brand, not a manufacturer — "hum manufacturer nahi hain" is a selling line, not an apology.
- One focus product at a time (wave discipline): Vitamin C Serum 10% first; nothing else sold for 60 days (Sunscreen wave 2, Night Cream wave 3).
- Gujarat first → West India → India. The brand is Indian from Day 1; the *energy* starts in Gujarat.
- Always "RANGAT NATURALS" — never "your brand", never a placeholder.
- Budget is small: founder + 1 part-time, ads start Day 21 at ₹500/day. No ad on Day 1.

1. DAY 0 — COMPLETE INSTAGRAM SETUP (do this before post #1)

Do all of this in one sitting (3-4 hours). Everything below is exact — type the exact strings.

1.1 Account basics

#	Step	Exactly what to do		
1	Account type	Personal → Professional account → Business → Category: Beauty & Cosmetics (Settings → Account type and tools)		
2	Username	Try in order: @rangatnaturals → @rangatnaturals.in → @rangatnaturalsindia → @rangat_naturals. Pick the cleanest available; keep it identical across WhatsApp Business, Facebook, YouTube Shorts. Never change it again.		
3	Name field (search field!)	**`RANGAT Naturals	Indian Skincare`** — this is where Instagram search matches first. (After sunscreen launch: `RANGAT Naturals	Serum & SPF India`.)
4	Bio (4 lines — each line does a job)	Use exactly the block below — it is keyword-loaded		
5	Link	Linktree or Stan Store with 3 items max, ordered by conversion: ① WhatsApp order (click-to-chat link) ② Website (if live) ③ Waitlist/offer page. Never 8 links.		
6	Contact buttons	Add WhatsApp button + Email button (Settings → Contact options)		
7	Avatar	Founder's face — warm, real, no heavy filters. A face converts a zero brand better than a logo. (Logo goes on products and pinned posts; avatar = the human.)		
8	Followers list	Switch to Hide followers if you want a clean look — off by default is fine too.		
9	Instagram SEO baseline	Fill alt text from Day 1 (Section 3, rule 7).		

THE EXACT BIO (type it character-for-character):

IN Indian skincare — Aamee skin, aamno liye
Vitamin C 10% · Face Wash · SPF — 4-6 hafte ka honest timeline
COD · Free shipping (launch) · WhatsApp par support
↓ DM "GLOW" ya WhatsApp par order karo

Why this bio works (the 3-second test):

- Line 1 = category + origin + signature line ("Indian skincare" is what people search).
- Line 2 = what we sell + honest timeline (no miracle — builds trust instantly).
- Line 3 = kills the risk (COD + support — the #1 fear of first-time buyers).
- Line 4 = one single action (DM "GLOW" / WhatsApp — the whole funnel in 4 words).

- Keyword load: Indian skincare, Vitamin C, Face Wash, SPF, COD, WhatsApp — all real search/decision words.

1.2 Highlights (6 — build the structure now, fill as you post)

Cover style: cream background, terracotta icon, one word each (make covers in Canva, 405×405).

Highlight	Contents	Update cadence
RESULTS	Day-1→28 tester photos (disclosed), review clips, "1 mahine ki journey"	Every new result
HOW TO USE	5-step VC how-to, 60-sec routine, layering order	Permanent + 1/season
REVIEW	Customer videos, quote cards, unboxings	Weekly
FOUNDER	Who we are, why Gujarat first, 20-tester story, factory visit	1/month
INSIDE	Ingredients explained, batch card, "hum manufacturer nahi hain" explainer, packaging	1/month
OFFER	Current offer (Founding 100 → then current), COD explainer, referral	Every offer change

Order matters: RESULTS is always first — for a zero brand, proof is the trust hook.

1.3 Pinned posts (3 — pin the reels as they arrive; the plan)

Pin	Post	Job
Pin 1	Hero product + offer reel (Day 8 intro / Day 21 launch)	*What to buy + how*
Pin 2	Day-28 before/after reel with disclosure (Day 17)	*Why trust us*
Pin 3	Founder/identity reel (Day 1 or Day 13)	*Who we are*

Re-pin review every 2 weeks. Pin 2 rotates with newer proof; Pins 1 and 3 stable for 90 days.

1.4 DM & comment settings (the order engine)

1. DMs ON for everyone (Settings → Messages → Message controls → allow all).
2. Quick reply (Settings → Business/Creator tools → Quick replies):
 - `GLOW` → "Namaste! Vitamin C Serum 10% — ₹600 (launch me free Face Wash mini + free shipping). COD hai. Aapka naam + city + WhatsApp number? Hum 15 min me reply karte hain."
 - `COD` → "COD = Cash on Delivery. Parcel pehle aata hai, dekh kar paisa do. Gujarat me 2-4 din."
 - `PRICE` → "Vitamin C Serum 10% — ₹600. Launch offer me free Face Wash mini + free shipping. DM 'GLOW' for order."

1. Auto-reply (IG + WhatsApp Business) — exact text:

"Namaste! RANGAT NATURALS yahan. 'GLOW' likhiye product + price ke liye. COD hai. Koi sawaal? Hum insaan hain, bot nahi."

(The "insaan, bot nahi" line is a brand line — keep it everywhere.)

1. Comment settings: keep all comments on (visibility = trust). Hide words list: add only the obvious spam/abuse words. Never turn off comments — a zero brand that silences comments looks guilty.
2. Reply SLAs (put on your calendar, not in your head):
 - All comments: within 2 hours (launch week: 15 min).
 - All DMs: within 15 minutes between 7:00 AM-11:00 PM.
 - Outside that window, auto-reply covers: "Hum 7:00 AM se reply karte hain — GLOW likhiye, pehle number aapka hoga."
1. WhatsApp Business: create now (free app). Catalog = 1 product (VC Serum 10%, ₹600, real photos). Click-to-chat link → paste into the bio link. Set the same auto-reply.

1.5 Day-0 checklist (tick every box before posting anything)

- [] Professional account + Beauty & Cosmetics category
- [] Username final (and matching WhatsApp/FB/YouTube)

- [] Name field = "RANGAT Naturals | Indian Skincare"
- [] Bio = exact 4 lines above
- [] Bio link = 3 items max, WhatsApp first
- [] WhatsApp + email contact buttons live
- [] Avatar = founder's face
- [] 6 Highlight shells with cream/terracotta covers (empty is OK on Day 0; fill during Days 1-30)
- [] Quick replies GLOW / COD / PRICE set
- [] Auto-reply text live on IG + WhatsApp
- [] SLAs on calendar: 15-min DM (7 AM-11 PM), 2-hr comments
- [] First 3 pins scheduled in your head: D8, D17, D13
- [] Alt text on, from post #1

2. INSTAGRAM SEO — WHERE KEYWORDS GO (this is a sales channel)

Instagram search and YouTube search answer "vitamin c serum price in india" and "skincare routine for oily skin" every day. For a zero-budget brand, search is the only reach that compounds for months — a Reel dies in 48 hours; a search-optimized post lives. SEO also makes Meta Ads cheaper: on-page keywords improve relevance scoring for ad delivery.

2.1 The 5 places keywords live (in ranking order)

Rank	Place	Rule	
1	Name field (IG)	Highest weight, 30 chars — "RANGAT Naturals	Indian Skincare"
2	On-screen text / hook text	IG OCRs (reads) on-screen text — the target keyword must appear in it	
3	Caption first line	First ~80 chars = the search snippet (natural-language search phrase)	
4	Hashtags	Topic clustering — Section 2.4 framework, never 30 random	
5	YouTube title + description	The big long-tail winner (top 3 Reels → Shorts, Fridays)	

2.2 The keyword bank (use these, rotate weekly)

Type 1 — PRODUCT (buy-intent, highest value — use in hero content): vitamin c serum india · vitamin c serum price in india · best vitamin c serum india · vitamin c serum for oily skin · vitamin c serum for dark spots (copy stays safe) · face wash for oily skin india · best face wash for men india · face wash for sensitive skin · moisturizer for oily skin india · best moisturizer for dry skin india · gel moisturizer india · sunscreen for oily skin india · best sunscreen india · sunscreen spf 50 india · no white cast sunscreen · night cream for glow · night cream india · face cream for dry skin india · lip balm india · lip oil india · body lotion india · hair oil for hair fall (careful claims)

Type 2 — PROBLEM (high volume, top-funnel): skincare for oily skin · skincare for dry skin · skincare for combination skin · tan removal skincare india (copy: "tan-look fresh dikhane ke tips") · dark spots on face how to remove (copy: "dark spots ka dikhna kam karne ke tips") · dull skin remedy · dull skin routine · glowing skin routine india · acne prone skin care routine india (copy: "acne-prone skin ke liye gentle routine") · monsoon skincare tips · summer skincare routine india · winter dry skin routine · hard water face problem · water spots on face (Gujarat angle)

Type 3 — EDUCATION (save-intent — builds the "smart brand" moat): vitamin c serum kaise use kare · vitamin c serum benefits in hindi · vitamin c morning or night · vitamin c and sunscreen together or not · sunscreen kaise lagaye · sunscreen reapply kaise kare · face wash kitni baar use kare din me · morning skincare routine steps · layering order skincare · serum moisturizer order · patch test kya hai · patch test kaise kare · spf 30 vs spf 50 · pa rating kya hai · broad spectrum kya hai · skin barrier kya hai · over exfoliation kya hai · natural skincare for indian skin · ayurvedic vs chemical skincare

Type 4 — LONG-TAIL (low competition, high conversion — YouTube Shorts gold): best vitamin c serum under 500 in india · vitamin c serum for 20 year old girl · sunscreen for students india cheap · face wash for college students india · skincare routine for beginners hindi / gujarati · monsoon skincare routine for oily skin india · wedding glow skincare 1 month before · diwali gift for girlfriend skincare box · naye brand se skincare order kaise kare safe · cash on delivery skincare brands india · vitamin c serum kya karta hai hindi me · gujarat me best sunscreen for summer · ahmedabad skincare brand (local-SEO — owns the map early)

Type 5 — GUJARATI/HINDI SEARCH PHRASES (underserved competition): "chamak ke liye kya lagaye" · "chehre par chamak ke tips" · "skin ke liye sabse achha kya hai" · "tan hatane ke tips" (copy: tan-look tips) · "khushk chehre ke liye kya lagaye" · "taazi skin ke tips" · "Vitamin C serum ka use kaise

kare" (many type in Hindi script too) · "gujarati skincare tips" · "amdaad (Amdavad) skincare" (local)

Where each type goes:

Keyword type	IG caption line 1	On-screen hook text	YT Short title	Reel topic
Product	✓ (hero posts)	✓	✓	Product reels
Problem	✓	✓ (hook = problem)	✓	Problem reels
Education	✓	✓	✓	Education reels
Long-tail	sometimes	rarely	✓ (primary)	Shorts only
Local	✓ (Gujarat posts)	✓	✓	Gujarat-first reels

YT Shorts title formula: `[Long-tail question] — [promise] (RANGAT)`. Example: "Vitamin C serum kaise use kare? — 5 steps, 40 second (RANGAT Naturals)". Description: 2 lines + 5 keywords + link. Upload cadence: top 3 Reels of the week, every Friday.

2.3 The 12-point Instagram search checklist (run on EVERY post)

1. Name field = "RANGAT Naturals | Indian Skincare" (category keyword inside the name).
2. Bio line 1 contains the category phrase users type: "Indian skincare."
3. Every Reel's on-screen hook text contains the target keyword or its Hinglish form (IG OCRs on-screen text).
4. Caption line 1 (before the fold) = the search phrase in natural language ("Vitamin C serum kaise use kare — 5 steps").
5. One dedicated "keyword Reel" per product per month whose entire job is a search query (title = the query).
6. Location tags: Ahmedabad / Gujarat on every Gujarat-anchored post (local search + local feed boost).
7. Alt text written manually per image/carousel (most brands skip it — it's free). Format: "[Product] being used on real skin, RANGAT NATURALS Indian skincare."
8. Hashtags: 8-15 per post from the framework below — never 30 random, never the same 30 every time.
9. Series naming: recurring series with searchable names ("Skin 101 #7", "4-Hafte Program") create a searchable brand of content.
10. Replies are indexed: the comment conversation around the keyword ("oily skin wale...") adds on-page keyword density — seed 2-3 genuine comment prompts.
11. Consistency window: post at 7:30-9 PM; the first 60 minutes of engagement decide distribution — the founder replies to every comment in that window.
12. Monthly keyword audit (30 min): Insights → "searches that led to profile" → top 10 → next month's content is 30% built from that list. (After Day 30 you have data; before that, use this bank.)

2.4 Hashtag framework (5 sets, 8-15 tags, rotated weekly)

Hashtags are topic clustering + search discovery — not reach incantations. 30 random hashtags = spam signal + zero relevance. Every post: 1-2 brand + 2-3 product + 2-4 problem + 1-3 location + 2-3 niche = 8-15 tags.

SET 1 — BRAND (always, 1-2): #RangatNaturals (primary — builds the searchable brand shelf) · #AameeSkinAamnoLiye (signature line — Gujarat posts) · #RangatGlow (offer/launch tag)

SET 2 — PRODUCT (2-3, match the product in the post): VC: #VitaminCSerum #VitaminCIndia #SkinGlow · Face Wash: #FaceWash #FaceWashIndia #CleanSkin · Moisturizer: #Moisturizer #GelMoisturizer #SkincareRoutine · Sunscreen: #Sunscreen #SPF50 #SunscreenIndia #NoWhiteCast

SET 3 — PROBLEM (2-4, match the problem): #OilySkin #DrySkin #DullSkin #TannedSkin #Pigmentation #AcneProneSkin #CombinationSkin #MonsoonSkincare #SummerSkincare #WinterSkincare #IndianSkin #SkincareForOilySkin #SkincareForDrySkin

SET 4 — LOCATION (1-3; always for Gujarat-anchored content): #Ahmedabad #Amdavad #Gujarat · Wave 2: #Surat #Vadodara · Wave 3: #Rajkot · National (only when content targets that city): #Mumbai #DelhiNCR #Bengaluru

SET 5 — NICHE/COMMUNITY (2-3): #SkincareIndia #IndianSkincare #DesiSkincare #SkincareRoutine #SkincareTips #SkincareEducation #SkincareCommunity #D2CIndia #SupportLocalBrands #MadeInIndia

Rotation rules:

- Never the exact same tag block twice in a row (rotate within sets).
- Never buy/irrelevant tags (#love, #instagood, #follow4follow — they poison relevance).
- Product-launch posts get the full brand set: #RangatNaturals #RangatGlow #AameeSkinAamnoLiye.
- Track weekly (30 min, Sunday): impressions from hashtags vs feed vs search → shift set weights (most Indian skincare reach comes from search + feed, so keep niche/product sets strong).
- After 10k followers: drop generic niche tags (#SkincareTips) — they stop helping and start hurting relevance.

The 30-day calendar (Section 3) assigns one set number to every day.

3. THE 30-DAY DAY-BY-DAY EXECUTION CALENDAR (21 fields per day — none skipped)

This is the heart of the guide. Every day carries all 21 fields: (1) DAY · (2) DATE/SEQUENCE · (3) PLATFORM · (4) POST/REEL · (5) CONTENT TYPE · (6) LOCATION · (7) POSTING TIME · (8) EXACT IDEA · (9) SLIDES (carousels) · (10) PURPOSE · (11) TARGET CUSTOMER · (12) HOOK · (13) CONTENT STRUCTURE · (14) SCRIPT · (15) ON-SCREEN TEXT · (16) CAPTION · (17) CTA · (18) SEO KEYWORDS · (19) HASHTAGS · (20) STORY SUPPORT (M/A/E) · (21) OPTION A (AI PROMPT) + OPTION B (FREE MANUAL) — the 21st field pair is the two ways to produce the post. Hooks, scripts, captions and story lines are the established RANGAT lines, verbatim.

How a day works (10 minutes to execute): read the 7-field meta table → produce the post with Option A or Option B → add the on-screen text + caption + hashtags + alt text + location → post at the posting time → post the 3 story slots at 8 AM / 1 PM / 8 PM → stay for the first 60 minutes and reply to every comment.

DAY 1 (Mon) — REEL, 15 SEC

#	Field	Detail
1	DAY	Day 1
2	DATE / SEQUENCE	Day 1 of 30 · Week 1 · Mon · launch-minus-20 days

5	CONTENT TYPE	Problem (Attention)
6	LOCATION	Ahmedabad, Gujarat
7	POSTING TIME	8:00 PM (2nd: 12:30 PM) (Gujarat IST — Section 10)

EXACT IDEA: Honest founder intro, no polish. "I'm starting a skincare brand from scratch — and I'll show you everything."

PURPOSE: Identity + trust anchor (founder face) + series promise. · Sales purpose: None directly (deliberate). Indirect: every future DM starts from this trust.

TARGET CUSTOMER: All — awareness cast. Especially 20–35 Gujarat.

CONTENT STRUCTURE:

SCRIPT: "Hi, main [Name]. Main Gujarat se hoon, aur maine RANGAT NATURALS shuru kiya hai — Indian skin ke liye skincare. AI video, 12 seconds, 9:16 vertical, UGC handheld. Indian woman 26, [CHARACTER], at a home window in monsoon light, morning. EXACT IDEA: The 40°/monsoon/AC trinity problem — the single most relatable Gujarat skin complaint.

PURPOSE: Attention + comment velocity (algorithm) + pain-point harvesting. · Sales purpose: Collect real pain points → tomorrow's DM follow-ups + future content. No selling.

TARGET CUSTOMER: Women 20-35, Gujarat, oily/dull skin.

HOOK (frame 1 — spoken + on-screen text): "Gujarat me mausam dekho. Aapki skin abhi kya kar rahi hai — aapko pata hai?"

CONTENT STRUCTURE: 3 quick location cuts (or 3 outfit/lighting changes to simulate): (1) outside/bright — sweat, shine; (2) AC room — face tight/dull; (3) mirror selfie — "thaka hua" look. Founder talks over B-roll.

SCRIPT: "Bahar 40 degree — oil, shine, pores wide. Ghar ka AC — tightness, dry patches. Aur dono ke beech ek look jo har mirror me dikhta hai — thoda dull, thoda 'brown'. Yeh teeno cheezein aapki skin roz saamne aati hain. Aur yeh teeno fixable hain — sahi routine se. Agle din se hum ise step by step samjhogi. Aapka sabse bada skin problem kya hai? OPTION A — AI GENERATION PROMPT (copy-paste, with the character sheet from Section 5.1):

AI video, 10 seconds, 9:16, UGC mirror-selfie. Indian woman 26, [CHARACTER], home mirror with round mirror light, monsoon afternoon. Cut 1 (0-3s): she looks at mirror, rubs temple, small frown — "thaka hua chehra" moment. Cut 2 (3-6s): cut to hand applying face wash lather to cheek, realistic foam. Cut 3 (6-10s): back to mirror, pats face, gives camera a "ab theek" nod. Indian bathroom background — white tile, towel, glass of water, lived-in. Natural window light, cool monsoon tone. EXACT IDEA: "100% herbal = safe?" — the myth every Indian buyer has, attacked honestly.

PURPOSE: Authority + differentiation (neither "totka-only" nor "chemical-scare"). · Sales purpose: Pre-frames Pillar 3 transparency (tomorrow's brand story).

TARGET CUSTOMER: 25-45, ingredient-curious, skeptical of both extremes.

HOOK (frame 1 — spoken + on-screen text): "'100% herbal' likha hai toh lagao? Pehle yeh sach jano."

CONTENT STRUCTURE: Founder to camera; B-roll: generic herbal jar (no brand visible), ingredient card, hand with a drop of serum. Split-screen "MYTH / REALITY" graphic for 2 sec.

SCRIPT: "Myth: herbal matlab safe, chemical matlab nuksaan. Reality: haldi, amla, koi bhi natural ingredient — galat concentration me ya galat skin par — irritation de sakta hai. Aur 'no chemicals' possible nahi bhi hai — water bhi chemical hai. Asli baat yeh hai: ingredient + concentration + aapka skin type. Teeno match kare toh herbal bhi kaam karta hai, scientific bhi. Yehi soch ke humne apna formula choose kiya. Kal: kyun exactly wahi choose kiya."

ON-SCREEN TEXT: "MYTH: Herbal = Safe" → "REALITY: Concentration + Skin Type = Key" → "H2O bhi chemical hai □"

CAPTION (line 1 = SEO phrase): "Aap kya check karti ho — brand ka naam ya ingredient list? Hum ingredient se shuru karte hain. #SkincareMyths #SkincareEducation"

AI video, 12 seconds, 9:16, UGC handheld, founder-to-camera + insert cuts. Indian woman 26, [CHARACTER], Indian kitchen counter, afternoon window light. Cut 1 (0-4s): she holds up a small green herbal paste bowl (blur), says (lip-sync later): "100% herbal — lagao?" slight eyebrow raise. Cut 2 (4-8s): quick insert — haldi/ubtan bowl, then a plain serum bottle side by side (both plain labels). Cut 3 (8-12s): back to face, calm direct look, small hand gesture: "herbal ≠ safe. 4. HOOK SYSTEM (16 types — every hook is scroll-stopping AND truthful)

For a zero-followers account, 100% of your reach is earned in the first 2 seconds. The hook is not a headline — it is the first spoken line + first on-screen text + first frame, all saying the same thing in under 2 seconds. If the hook needs a "welcome" or "so today we will...", it is dead. Start mid-action.

Hook anatomy (pick a type, fill the blank):

1. Who it's for (segment callout): "Oily skin wale, ruko..."
2. The tension (problem/fear/myth): "Yeh galti aap roz karti ho..."
3. The payoff promise (what they'll get in 30 sec): "60 second me samjho..."

Retention engineering (apply to every reel):

- 0-2s: hook (spoken + text + face close)
- 2-5s: pattern interrupt — a cut, a prop, a "wait" ("par ruklo, yeh dekho")
- Every 5-7s: new visual or new micro-promise ("aur 2nd cheez zyada important hai")
- Last 3s: CTA (spoken + text)
- Hard cap: 30-45 sec for product/education; 60 sec max for stories.

Compliance line: hooks may create curiosity and name problems; they must NOT promise cures. "Tan hamesha ke liye khatam" ❌ → "Tan-look fresh dikhane ka tarika" ✅.

The 16 hook types (with ready lines from the RANGAT library)

1. CURIOSITY (stranger-stoppers). "3 mahine humne sirf ek serum dhoondha. Wajah dekho." · "Yeh 1 ingredient Indian skin ke liye game-changer hai — 99% log ise galat lagate hain." · "Aapke bathroom me ek cheez hai jo aapki skin roz kharab kar rahi hai." · "Ek drop. Bas itna. Phir 4 hafte." · "Yeh 2 products alag alag theek hain — milakar? Kharab. Kaun se? Aage dekho."
2. PROBLEM (name the pain in their words). "Gujarat me 40 degree — aapki skin abhi kya kar rahi hai, aapko pata hai?" · "Monsoon me oily skin wale logo — aap roz yehi galti karti ho." · "Chehra subah theek, shaandh 'thaka hua' — yeh normal nahi." · "Pores bade, skin rough — hard water ka role aapne socha?" · "10 saal se wahi 3 dark spots? Yeh unka sachcha naam hai."
3. FEAR / LOSS-AVERSION (sparing, truthful). "UV window se bhi aata hai — ghar baithe bhi." · "Cloud ke din bhi 80% tak UV aata hai. 'Aaj toh dhoop nahi' — yahi sabse mehngi soch hai." · "Galat sunscreen = SPF 50 bhi bekar. Yeh 2 galtiyan dekho." · "3 din me 'full glow' wala brand? Aapke paise wahi utar jaate hain." · "Pehli baar kisi naye brand se lete ho? Yeh 2 sawaal zaroor puchho."
4. BEFORE/AFTER + TRANSFORMATION (ONLY real, disclosed results). "Day 1. Day 28. Same light, same angle. Dekho khud." · "20 testers, 4 hafte, 20 kahaniyan. Aaj 3." · "Is aahai ne 2 hafte me kya dekha — honest, achi bhi baat, kami bhi." · "Hum 'before/after' nahi dikhaate. Hum 'day 1 aur day 28' dikhaate hain — farq padta hai." · "Same room, same window, 28 din. Aap khud judge karo."
5. MISTAKES / "STOP DOING THIS". "Chehra din me 4 baar raho — ruko. Yeh galti aap bhi karti ho." · "SPF sirf bahar jaane par? Yeh soch 2010 ki hai." · "Vitamin C serum bheege chehre par? 99% log yahi karte hain." · "6 layers ka routine — aap 3 ki aadat nahi daal pati? Yeh dekho." · "Face wash ka foam zyada = saaf zyada? Myth. Dekho."
6. MYTH VS REALITY. "'100% herbal' likha hai toh lagao? Yeh sach jano." · "Vitamin C se chehra orange? Yeh myth kyun chalta hai." · "'Sasta serum = kharab serum'? Label padh ke bolte hain." · "SPF 50 = SPF 30 se double protection? Nahi. Yeh math dekho." · "'Raaton raat glow' — yeh shabd sunte hi page band karo."
7. UNEXPECTED FACT. "Aapki skin 28 din me poori naye ho jaati hai — isliye 28 din ka wait." · "Water bhi chemical hai. 'No chemicals' product possible nahi — yeh sach." · "Aapke phone me din me chehra 15+ baar chhoota — ab aapko samajh aa gaya." · "20% zyada Vitamin C = 20% zyada fayda? Lab kya kehta hai, dekho."

Aap kaunsi lagati ho — aur kyun?" · "Oily skin pe moisturizer? Haan ya nahi? Comment karo." · "Aapka routine me kitne products hain? 3 se zyada? Ruko."
9. CONTROVERSY-ADJACENT (bold but safe — never attack named brands). "2000 ki imported cream vs 500 ki Indian — hum ingredient list khol ke batate hain." · "Hum 'anti-Ayurveda' nahi, 'anti-blind-totka' hain. Farq padta hai." · "'Sasta' word se humein darr nahi — 'sasta soch' se darr hai. Aaj samjhaienge."
10. RELATABLE / SITUATIONAL (share machines). "Gujarati ghar me pehli baar 'skincare' shuru ki? Watch this." · "Maa: 'Cream kya hai?' Mene: 'Skin ke liye.' Maa: 'Nani ke waqt chehra kharab tha?'" · "Gujarat me shaadi ka season — 2 hafte pehle 'glow kar li' wala pressure." · "Chai break + 2 minute — haan, itne me routine ho jaata hai." · "Diwali aate hi 'naya main' wala plan — skin wala bhi."
11. STORYTELLING / FOUNDER. "Brand banana kitna mushkil tha — koi reel nahi batati. Main bataati hoon." · "Pehla formula? Reject. Yeh kahani suno." · "Main Gujarat se hoon — aur isliye humara pehla customer Gujarat hai." · "20 aahaiyon ne 4 hafte humara product pehla try kiya. Unka farz tha honest baat karna."

Asli reaction." · "Humari page pe 1 bhi fake review nahi — isliye yeh 1 review bhi original hai." · "20 testers me se 18 ne kaha: 'continue karungi.' 2 ne kaha: 'mujhe nahi pasand.' Dono ki baat suno."
14. COMPARISON (brand-neutral, never naming & bashing). "Imported 2000 vs Indian 500 — ingredient list khol ke comparison." · "SPF 30 vs SPF 50 — math samjho, phir khud decide karo." · "Gel moisturizer vs cream — aapki skin kaunsi chahiye, 30 sec me." · "Ubtan vs serum — dono ki jagah alag hai. Yeh dekho." · "10% VC vs 20% VC — zyada = behtar? Lab kya kehta hai."
15. OFFER / URGENCY (only TRUE scarcity — real seat counts, real dates). "Kal. 100 boxes. Aapka number?" · "Founding 100 — launch price + free Face Wash mini + free shipping + COD. 100 seats, phir nahi." · "X seat bachi (real number) — batch 1 ke baad price badlegi." · "Do ₹100, lo ₹100 — aaj se referral."

Hook selection matrix (which style when)

Post job	Best styles	Why
Reach new strangers	Problem, Relatable, Curiosity, Story	High CTR on cold feed; emotion first
Build authority (education)	Myth, Fact, Mistake, Question	Saves + search; "smart brand" signal
Product desire	Demo, Comparison, Curiosity, Challenge	Sensory + proof; ad-ready
Trust (UGC/proof)	Social proof, Before/after (disclosed), Story	Converts evaluators; UGC voice
Sales (offer)	Social proof, Problem→offer, Urgency ("X seat"), Comparison	Direct action; pair with offer
Retargeting ads	Before/after, Social proof, Mistake, "X seat left"	They already know you; nudge + proof

Rotation rule: never the same hook style 2 reels in a row; never reuse a hook in the same month. Keep a sheet: hook used / date / views / CTR / DMs. Kill bottom-10 hooks, rewrite top-10 with new angles.

5. AI CONTENT CREATION SYSTEM (Option A — the creative factory)

AI is your creative factory for testing: fast, cheap variants that find hooks/angles which humans then shoot for scale. It is NOT a replacement for real people, real products, real proof. Five rules of the road:

1. Never pass AI video off as a real customer. In the UGC slot, AI-generated "creator" videos must be labeled or used only as *concept/teaser* assets ("aapki kahani bhi yahan ho sakti hai" style). Real testimonials, real before/after = humans only. (Also protects you under ASCI/Meta policies.)
2. AI video models butcher brand text. Do NOT ask the model to render "RANGAT NATURALS" on a label or on-screen text. Generate WITHOUT readable label text (plain label or blurred), then add the real label (product insert), on-screen hook text, captions and CTA in CapCut/Premiere. Every prompt in this book assumes that workflow.
3. Consistency lock: define ONE virtual character sheet and reuse it across prompts (same face, hair, outfit) so a "character" appears in 5-10 videos — a recurring face builds parasocial trust, even if AI.
4. Skin realism is the whole point: no beauty filters, no smooth skin — every prompt enforces "natural skin texture, visible pores, no retouch."
5. Use AI images for: profile placeholder shots, carousel backgrounds, flat-lays, "in a real Indian home" backgrounds, ad statics (labeled as brand visuals).

5.1 The character sheet (paste into every prompt)

CHARACTER: Indian woman, 26 years old, medium-tan (Indian) skin tone with natural texture and visible pores, light brown eyes, shoulder-length straight hair, small nose stud, no makeup or very minimal (tinted lip only), wearing a simple beige cotton kurta. Warm, calm, slightly smiling. No beauty filter, no skin smoothing, no airbrushing — realistic, slightly imperfect, natural.

Male variant: Indian man, 28, light stubble, short black hair, white T-shirt, natural skin texture. Gen-Z variant: Indian woman, 20, college hoodie over kurta, ponytail, no makeup, natural skin.

5.2 The AI prompt bank (by Reel length — copy, fill, generate)

5-SECOND (hook-only / pattern-interrupt) — Prompt A (texture hook):

AI video, 5 seconds, 9:16 vertical, UGC selfie style. Indian woman, 26, [CHARACTER], sitting at a home bathroom counter in soft window daylight, morning. She looks at the camera with mild curiosity, then holds up a small amber skincare bottle (label plain, no text) toward the camera. Handheld phone camera, slight natural shake, front-facing angle at eye level. One gesture: raises the bottle 10 cm and tilts it gently. Background: real Indian bathroom — white tile, a glass of water, a towel, a small plant; slightly lived-in, not staged. Lighting: single soft window light, warm morning tone, gentle shadows. Expression shift: neutral → slight knowing smile. No on-screen text, no logo, no music. Natural ambient sound only.

Post-production (CapCut): frame-1 text "Ek drop. Bas itna." + final frame: product label overlay + "RANGAT NATURALS — DM GLOW". Hook audio: her voice: "10 second. Ek drop."

5-SECOND — Prompt B (mirror hook):

AI video, 5 seconds, 9:16, UGC mirror-selfie style. Indian woman 26, [CHARACTER], in front of a home mirror with a round mirror light, early morning, slightly tired but fresh face, natural skin. She touches her cheek with two fingers and looks at the camera through the mirror with a "wait, did you see that?" expression. Handheld phone, mirror angle, minor shake. Background: typical Indian bedroom mirror, clothes on chair, window light. Lighting: cool-morning window light + warm ring light, realistic mix. No text, no logo. Natural sound.

Post-production: text "Chehra thaka hua? Aaj badalenge plan." → CTA text "DM GLOW".

8-SECOND (problem → product reveal) — Prompt C:

AI video, 8 seconds, 9:16, UGC handheld. Indian woman 26, [CHARACTER], Indian home living room, afternoon window light. Cut 1 (0-3s): she looks at phone with a small frown, then puts it down, exhales, looks at camera — "tired face" moment. Cut 2 (3-5s): quick cut to her hand opening a small amber skincare bottle (plain label), one pump of cream into palm, close-up of texture spreading, natural skin. Cut 3 (5-8s): back to face, she smiles calmly, lightly pats her cheek. Handheld phone feel, natural shake, eye-level. Background: real Indian home — wooden table, a chai glass, curtain with daylight. Warm afternoon light, soft shadows. No on-screen text, no logo, no heavy audio.

Post-production: text track 0-3s "40° bahar, AC andar — skin beech me." → 3-5s "Humara jawab: 2 drops." → 5-8s "RANGAT — aamee skin, aamno liye." + CTA card 1s: "DM 'GLOW' · COD". Voice (real, recorded): "Monsoon me skin thakti hai. Yeh 2 drops uska din theek karte hain."

8-SECOND — Prompt D (male, for the Face Wash wave):

AI video, 8 seconds, 9:16, UGC handheld. Indian man 28 [male sheet], hotel-room bathroom, morning. Cut 1 (0-3s): he looks at mirror with shine on forehead, wipes with towel, slight "ugh" face. Cut 2 (3-5s): close-up: lather of a white face-wash cream in palm, realistic foam, natural hand. Cut 3 (5-8s): he pats his face dry, gives the camera a small confident nod. Handheld, mirror + face mix, slight shake. Background: guesthouse bathroom, towel, soap dish. Cool morning light from window. No text, no logo.

Post-production: text "9 se 9 office. 60 second skin." → "Mard bhi skin." → CTA "WhatsApp link in bio".

10-SECOND (problem → routine → result-promise) and 15-SECOND (founder/BTS) patterns: use the same 3-cut structure as C/D, add a 4th cut for the CTA card, keep total ≤15s, and follow the 30-day calendar's per-day prompts (Section 3) — each day carries a complete prompt written for that day's idea, including subject, model, appearance, product, background, lighting, camera angle, movement, expression, pose, product placement, on-screen text, style, UGC feel, length, aspect, hook and CTA.

AI IMAGE prompts (carousel backgrounds / flat-lays / ad statics):

AI image, 1080x1350 (4:5), cream (#F6F1E7) background, soft top light, minimal Indian home prop in corner (chai glass / towel / small plant), terracotta accent, clean negative space for bold text, realistic photo style, no readable brand text.

AI image, 1080x1350, top-down flat-lay on cream towel: small amber serum bottle, a glass of water, folded beige cotton, soft window shadow, realistic Indian home texture, no text, no logo.

AI UGC label rule (always): any AI "person" used in a UGC-format slot gets an on-screen label "AI concept" in the first 3 seconds and is NEVER presented as a customer. Character consistency: one sheet, reused — the same face in 5-10 videos.

6. FREE / MANUAL SYSTEM (Option B — zero budget, always legal)

Every day in the calendar has an Option B you can execute with one phone, one person, and free stock. Rules first — they are the whole game for a small brand.

6.1 Legal free-stock rules (non-negotiable)

- ONLY free-licensed platforms: Pexels, Pixabay, Unsplash (video + images). Their licenses allow commercial use without attribution (always re-check the license page for that specific clip — it is free, 30 seconds).
- NEVER download from Instagram, TikTok, YouTube, reels of other brands, or any copyrighted source — no matter how "inspired" you are. Watermarked clips are not free.
- NEVER present stock footage as your product, your customer, or your factory. Stock = B-roll and background only. Your product must always be your real bottle/box; your founder must always be you.
- ALWAYS add your own value on top of stock: your voice-over, your text overlays, your product close-ups, your edit. A stock clip + your hook text + your product = an original post. A stock clip alone = not yours.
- Faces: if stock shows a recognizable person and you use it, you are safe under the license, but prefer hands/texture/objects shots — they blend better and avoid uncanny faces next to your product.
- AI-generated "customers" are forbidden (see Section 5, rule 1). Real customer = real person, on camera, with written consent.

6.2 Stock search-term bank (copy these searches)

Need	Search (Pexels/Pixabay/Unsplash)	Use for
Oily face / shine	"woman touching face window", "oily skin close up", "wiping face towel"	Problem reels D1, D2
Washing face	"woman washing face bathroom", "face wash foam hands"	D2, D7, D23
Applying cream/serum	"woman applying cream face", "skincare hands close up", "lotion on hand"	D8, D9, D16
Sunscreen	"sunscreen on hand close up", "woman applying sunscreen", "sunny window light"	D11, D18
Morning routine	"morning routine woman bedroom", "alarm morning light"	D23, D30
Night routine	"woman bed night lamp", "night skincare"	D28
Kitchen / chai	"chai glass table", "indian kitchen morning", "masala chai"	D5, D14, D25
Mother/family warmth	"indian mother daughter kitchen" (use as B-roll, voice = real people)	D5
Unboxing	"unboxing hands parcel" (hands only)	D24 fallback
Packaging / boxes	"kraft box packing hands", "tissue paper box"	D20
Texture / liquid	"oil drop slow motion", "liquid texture macro"	D16
Mirror selfie mood	"mirror selfie woman bedroom"	D1, D11

6.3 The phone workflow (your studio is a window)

- Light: face a window (natural light = free studio). Shoot between 9–11 AM or 3–5 PM. For night content, one warm 2700K lamp.
- Stability: phone on a stack of books or a ₹500 mini-tripod. Same height, same distance for B/A shots (20–30 cm, eye level).
- Angles: (1) eye-level face close, (2) hands close-up (product/texture), (3) over-the-shoulder, (4) top-down flat-lay for carousels/boxes.
- Audio: record voice separately in a quiet corner (CapCut voiceover). Room echo kills trust.

- Recording rule: 3 takes per shot (the "take 2 rule" — the second take is almost always best).
- Edit: CapCut (free). Cuts every 2–3s. Text: 2 sizes max (hook = biggest). No filters on face shots.
- Sound: one ambient track, -20 dB under voice.
- Export: 1080×1920 (9:16) for Reels/Stories; 1080×1350 (4:5) for carousels.

6.4 Canva workflow (free plan is enough)

- 1 master carousel template (cream background, terracotta + charcoal text, 2 fonts max) — reuse for ALL carousels (consistency = brand).
- 1 story template (1080×1920, same colors) for quote cards, quiz reveals, countdowns.
- 1 profile cover set (405×405, one word, cream + terracotta icon).
- 1 quote-card template for UGC reviews (real quote only, name + city).
- Rule: product photos are always your real photos — Canva never invents your product.

6.5 The 6 manual Reel templates (shoot these when you have nothing to shoot)

1. Hook cut: you + one line to camera (2s) → cut → one product shot (3s) → cut → CTA (2s). 7 seconds, any topic.
2. Texture reel: 3 macro shots (drop → spread → apply), ASMR sound, 8–10s.
3. Myth flip: you say the myth (2s) → "Nahi." (1s) → the fact with one prop (5s) → CTA (2s).
4. Story clip: one honest BTS moment (packing, reject, mistake) + 3 lines of voice. 10–15s.
5. Unboxing: parcel → tissue → items one by one → "wah" moment. 12–15s (customer or you).
6. Quote card + B-roll: real customer line (text over soft B-roll of your routine/box) + 3s CTA card. 10s.

6.6 Manual before/after (the only kind you will ever post)

- Real tester, real product, real 4 weeks. Written consent signed (template in Section 14).
- Same everything: same window light, same chair, same distance, same phone, no filter, no retouch.
- Card in frame: printed card "Day 1 — RANGAT 4-hafte program" held next to the face on BOTH photos.
- Show the boring middle: Day-7 "abhi kuch nahi dikh raha" frame is REQUIRED honesty.
- Ratio: for every 3 positive B/A, include 1 honest "no visible change / minor irritation" note — this is what makes the positives believable.
- Always on-screen: "Day 1 → Day 28 · 4 hafte · Results may vary".
- Photograph weekly (Day 1/7/14/28) — the weekly set becomes 4 reels + 1 carousel + 10 story frames from one shoot.

7. REEL FORMATS BY DURATION (what to make at which length)

Length	Structure	Use for	AI-feasible?	When
5s	Single hook beat — one gesture, one line, one text	Pattern-interrupts, top-of-feed attention, ad variants	✓ fully (Prompt A/B)	2-3/week; test hooks cheaply
8s	Problem (3s) → product reveal (2s) → result-promise (3s)	Quick problem→solution, texture reveals	✓ fully (Prompt C/D)	Hero product intro moments
10s	Problem → routine step → payoff	Micro-tutorials, "10 second. Ek drop."	✓ with real VO	Education micro-doses
15s	3 cuts × 5s: hook → proof/texture → CTA	Standard workhorse reel	✓ (B-roll) + human VO/face	Default length for most calendar days
20s	4 cuts: hook → 2 proof beats → CTA	Q&A rapid, mistakes (3 × 5s + CTA)	✓ B-roll, human voice	Education deep-dives, founder answers
30s	5-6 cuts with a story arc	Founder story, testimonial, launch film, B/A drop	✗ — manual-first (real people)	Trust and sales content: always human

Rules:

- Hard cap: 30-45s product/education; 60s max for stories.
- The first 2 seconds must contain the spoken hook + on-screen text + a face or a moving product — all three.
- 5s and 8s reels are your ad-testing factory: generate them weekly (AI), test as 4-creatives in Meta, and shoot the winner on a human for scale (UGC ≈ 2× brand creative ROAS).
- B/A and testimonial reels are 30s, manual-first, forever — no AI face, ever.

8. CAROUSEL SYSTEM (10 blueprints, slides 1-6 + CTA)

Carousels are the save + search engine: they rank in IG search, get re-swiped, and pin in Highlights. 2 per week minimum (calendar assigns exact days). All on the one master cream/terracotta template (Section 6.4). Slide 1 = hook (big type), last slide = CTA.

C1 — "5 daily skin-killers" (education, Day 3): S1 hook: "5 daily skin-killers — #3 aap bhi karti ho." · S2: "1. UV window se bhi aata hai — ghar pe bhi." · S3: "2. 9. STORY SYSTEM (your #1 conversion surface)

Reels bring strangers; Stories convert the 10-30% who follow — your actual buyers — because for a small account, Stories feel like a relationship. Stories are your DM warm-up machine. Same 3 slots go to WhatsApp Status the same day (zero extra work; Gujarat buyers are heavy WhatsApp-Status users).

9.1 The 3-slot daily formula (15 min/day, batchable)

Slot	Time	Job	Format
Morning (7:00-9:00 AM)	"Roz ka 1 sach"	Value + habit	1 educational tip OR routine shot (1-2 frames) + 1 question box/poll
Afternoon (12:30-2:30 PM)	"Peeche ki kahani"	Trust/behind-the-scenes	1 BTS frame (packing, testing, founder, lab visit, a mistake) + 1 poll or quiz
Evening (7:30-9:00 PM)	"Aaj ka CTA"	Conversion	1 product/offer/review frame + DM CTA ("GLOW likho") or link sticker (WhatsApp)

Story rules:

- 3-5 frames max per slot. Frame 1 = hook (text or face). Frames 2-4 = value. Last frame = engagement (poll/question) OR CTA.
- Always end the evening slot with a DM CTA or link sticker — this is the silent order engine (many buyers DM from Stories, not Reels).
- Reply to EVERY poll/question answer within 2 hours (DM conversation = pipeline).
- Highlights updated weekly.
- Never more than 12 frames/day — volume kills quality.

Asset types (rotation): Polls · Question boxes · Quizzes (answer reveal in next story) · This-or-that (product A/B) · Countdown (launch/offer) · BTS (packing, lab, founder fail) · UGC repost · Review quote card · "Ask us anything" box · "Day X of 30" progress · Flashback ("1 mahine pehle hum yahan the").

9.2 The 30-day story calendar (M = Morning · A = Afternoon · E = Evening)

Day 1 · M: "Aaj se yahan roz 1 skin-sach milega. Aapka skin type kya hai? (poll: oily/dry/combo/confused)" · A: Founder photo + "hum kaun hain — 15 second me" (video) · E: "30 din ka safar shuru. Follow on karo + GLOW likho DM me (list me aana ho)."

Day 2 · M: Tip: "Subah uthke pehli cheez: gunguna paani, nahi thanda. Kyun? (answer next frame)" · A: BTS: content shoot ka 10-sec clip · E: Question box: "Aapka #1 skin pareshani? (best 3 kal answer honge)"

Day 3 · M: Quiz: "UV window se aata hai? a) haan b) nahi" → reveal: haan · A: BTS: label ka 2nd version, "kyun badla?" · E: "Aapne puche 3 sawaal — video link (Reel). Aur aapka sawaal? DM."

10. POSTING TIMES (Gujarat IST — and how to replace them with YOUR data)

These are Day-1 defaults tuned for a Gujarat audience's day (work 9–9, chai breaks, evening scroll after dinner) and for the platform's distribution engine (the first 60 minutes of engagement decide reach). Do not assume the same time for every content type — each format has its own job and its own window.

10.1 The time table (Gujarat / IST)

Format	BEST	2ND BEST	Why
Reels (default)	8:00 PM (7:30–9:00 PM window)	12:30 PM (12:15–1:15)	Evening = peak scroll + full attention; the 7:30–9 PM window is the established consistency window — first 60 min decide distribution
Reels (problem/relatable)	8:00 PM	12:30 PM	Share content spreads on dinner-time scrolling
Reels (product/launch)	12:30 PM	8:00 PM	Lunch break = purchase browsing; launch day D21: 12:00 PM sharp + all 3 story slots
Carousels	9:00 PM	12:30 PM	Swipes need quiet evening attention; saves happen late
Stories — Morning slot	8:00 AM	7:30 AM	"Roz ka 1 sach" with the morning chai
Stories — Afternoon slot	1:00 PM	12:30 PM	Lunch BTS — "peeche ki kahani"
Stories — Evening slot	8:00 PM	7:30 PM	"Aaj ka CTA" — must land before the DM window closes at 11 PM
Weekends (Sat)	Reels 12:00 PM · Stories same 3 slots	—	Saturday lunch is the weekend peak in Gujarat
Weekends (Sun)	Reels 11:00 AM · Q&A slot	Stories 8 AM / 1 PM / 8 PM	Sunday = "aapke sawaal ka din"

Operating rules:

- One Reel a day (5–7/week), 2 carousels/week, 3 story slots/day, minimum — this IS the calendar's job; times above are when you press "post."
- Be in the first 60 minutes: after posting, the founder replies to every comment within that hour (this is the single highest-leverage 60 minutes in the whole system).
- Never delete + repost to "fix" a time — it resets your engagement window and looks spammy.
- Same time on WhatsApp Status (all 3 slots, same day) — zero extra work.

10.2 How to replace these with YOUR data (after 2–3 weeks, ~Day 21)

1. IG Insights → Audience → "When your followers are most active": look at your top cities (Ahmedabad first). Your real peak ± 1 hour is your new anchor.
2. IG Insights → Content → 24-hour reach graph (per post type, once you have 20+ posts): note when Reels vs carousels actually peak for YOU — they often differ by 1–2 hours.
3. The A/B hour test: for 2 weeks, post one Reel a week at your current best +1 hour. Keep the winner. One variable at a time.
4. Keep the DM window fixed: 7:00 AM–11:00 PM reply SLA does not move — posting time serves it, not the other way round.
5. Re-audit monthly (30 min, Sunday, with the KPI review) and write the new times in your Sheet's "Posting" tab.

11. GUJARAT FIRST → WEST INDIA → INDIA (not a Gujarat-only brand)

The strategy: Gujarat is where the ENERGY starts, not where the brand ends. Bio says "Indian skincare". Name field says "Indian Skincare". First customer is Gujarati; first national post is a "Gujarat se shuru, India ke liye" story. The origin is a badge, not a limit.

11.1 City waves

Wave	City	When	Angles that land	Ads
Home base	Ahmedabad (60% of launch energy)	Days 1-30+ (forever)	Hard water, 40° summers, chai+thepla mornings, SG Highway, "dhool", college life in Amdavad, vasadi chats, shaadi season, Diwali gifting	C1 from Day 21 (broad + interest)
Wave 2	Surat (young, fast, aspirational)	Wk 4-6	"Diamond city hustle" (9-to-9 + glow), student budget content, "sheher ka dhool", 2-minute routine	Add Surat to prospecting after Ahmedabad CPA is known
Wave 2	Vadodara (culture, colleges)	Wk 6-8	Festival + wedding-glow season, college hubs, "Vadu" humor (light), art/culture aesthetic	Add Wk 6-8
Wave 3	Rajkot (value + family)	Wk 8+	Dry winters (face cream wave), value-for-money, family gifting (maa/nani), "Rajkot walo" callouts	Add Wk 8
National	Top-6 India cities	Day 60+ (C4)	"Indian skin" creative — never "Gujarat only" creative nationally	+6 cities in C4, kill any city >1.3x Gujarat CPA

Creator map: 60% Gujarat / 40% other cities from Day 60.

11.2 Language strategy (per-post matrix)

Format	Gujarati	Hinglish	English	When
Founder reels	40%	50%	10%	Warm Gujarati-Hindi mix — authentic, not translated
Problem/relatable reels	60%	40%	0%	Max shareability — local humor
Product/education reels	20%	70%	10%	Clear Hinglish; key terms on-screen in English (search)
UGC creators	creator's native mix			Gujarati creators → Gujarati-first; Hindi creators → Hinglish
Sales/offer posts	30%	60%	10%	Offer clarity in Hinglish, warmth in Gujarati
Captions/keywords	—	70%	30%	Captions carry the SEO keywords (English/Hindi search terms)

The 3 signature lines (rotate): "Aamee skin, aamno liye." (Gujarati) · "Asli skin, asli result." (Hinglish) · "Skincare that understands Indian skin." (English — for the India-next phase).

Gujarati flavor rules (natural, not forced): Gujarati for *warmth* (relationships, home, chai, nani, maa), Hinglish for *product facts*. Never make English the default voice — it signals "imported brand" to the first market. Local references that land: chai + thepla mornings, 40-degree summers, monsoon humidity, SG Highway, "dhool", shaadi season, Diwali gifting, college life in Amdavad, vasadi chats, "dhamaka daam" value energy (without cheapening the brand). Do NOT use Gujarati as a punchline or stereotype — the founders/creators use it because it's their language.

11.3 The content ratio that keeps you Indian, not regional

Month	Gujarat	All-India
Month 1	70%	30%
Month 2	50%	50%
Month 3	40%	60% (Gujarat stays the home base forever)

Ads geo path: Ahmedabad → +Surat/Vadodara (Wk 4) → +Rajkot (Wk 8) → top-6 India cities (Day 90+). Keep Gujarati in the brand voice even in the national phase — it's a differentiator, not a barrier. And the proof story travels: "Gujarat me 20 testers, 100 pehli customers — ab India ke saath" is a stronger national launch story than a brand that never had a home.

11.4 Seasonal content calendar (Gujarat weather = content engine)

Period (Gujarat)	Skin reality	Product focus	Content theme
Mar-Jun	40°+, max UV, outdoor tan-look	Sunscreen (hero), Face Wash, Gel Moisturizer	"Garmi ka plan", SPF education, "tan-look" reels
Jul-Sep	Monsoon: oily, sweat, dullness, breakout-prone feel	Vitamin C (hero), Face Wash, SPF (monsoon confusion)	"Monsoon dullness", "baarish me sunscreen?" — YOUR LAUNCH WINDOW
Oct-Dec	Cooling + dry start; wedding PEAK; Diwali gifting	Sunscreen (wedding glow), Lip Care, gifting boxes, Night Cream	"Wedding glow 6 hafte pehle", Diwali gift boxes
Jan-Feb	Dry, cold nights, tight skin	Face Cream (hero), Body Care, Night Cream, Lip Care	"Sardiyon ka plan", dry-skin SOS, New Year "nayi skin"

Seasonal hook bank: "40° me 10 minute bahar — aapki skin ne kya face kiya, dekho." · "Baarish ke din bhi UV aata hai — monsoon sunscreen confusion khatam." · "Shaadi season: 6 hafte pehle glow plan, aaj se." · "Diwali pe 'dhyani' wala gift — box dekho." · "Sardiyon me subah uthne par tight face? Aaj se nahi." · "Rajkot ki sardi + Ahmedabad ki dhool — dono ka jawab alag hai."

12. CONTENT MIX (what % of what — and why)

The ratio is fixed by the CEO verdict: Awareness 20% · Education 25% · Trust 30% · Sales 20% (±5%).
Sales rule: after Day 15, exactly 1 in 5 posts is a direct-sell post (max 3-in-9 in seasonal/offer windows).
Never 2 sell posts in a row. This is how a zero brand sells without being that brand everyone mutes.

Bucket	% of posts	Job	Formats	Calendar share
Attention (relatable/problem/curiosity)	20%	Stop the scroll of strangers	Relatable skits, problem reels, hook-only 5s	~6/30 days (D1,2,5,15,22,25)
Education (save-intent)	25%	Make RANGAT the "smart" brand; feed search	Carousels, how-to reels, myth vs reality, layering	~8/30 (D3,4,7,10,11,18,23,28)
Trust (proof/UGC/founder/BTS)	30%	Convert evaluators — the biggest bucket for a zero brand	B/A (disclosed), testimonials, founder story, BTS, creator collabs	~9/30 (D6,9,12,13,16,17,19,24,26,29)
Sales (offer/direct)	20%	Collect the DMs	Launch film, what's in the box, COD, referral, seat counts	~5/30 (D8,14,20,21,27)

Your other buckets, mapped (so nothing is missing):

- Entertainment = inside Attention (relatable skits, humor — D5, D14, D29).
- UGC = inside Trust (D24, D26, D19 + creator wave).
- Problem-solution = inside Attention→Education bridge (D1, D2, D11, D15).
- Demo = inside Trust/Attention (texture D16, how-to D9, challenge L-hooks).
- Social proof = inside Trust (B/A D12/D17, testimonial D26, referral D29).
- Founder = inside Trust (D6, D13, D30 + weekly 1).
- Community = inside Sales/Attention (referral D29, question boxes, "Amdavad wale").

How to use it: the 30-day calendar already encodes this mix — do not "fix" a day's type. If a week's mix drifts (e.g., 2 sell posts), the next post must be Education or Trust. The Sunday KPI review checks the mix for the coming week.

13. LEGITIMATE BEFORE/AFTER (the only kind you will ever post)

Before/after is the highest-converting asset in skincare — and the fastest way to die under ASCI/Consumer Protection rules if faked. RANGAT's rule: we do not show "before/after". We show "Day 1 and Day 28" — with the receipts.

The 8 rules:

1. Real testers, real product, real time. 20-tester × 4-week program from before launch. No stock photos, no AI faces, no "actors posing as customers".
2. Written consent, kept on file (template below). If consent lapses, the content comes down.
3. Same everything: same window light, same angle, same distance, same phone, no filter, no retouch. A printed card ("Day 1 — RANGAT 4-hafte program") in BOTH frames is the signature.
4. Disclosed on every frame: "Day 1 → Day 28 · 4 hafte · Results may vary". Never crop it out for the ad version.
5. Show the boring middle: the Day-7 frame ("abhi toh shuru hai — kuch nahi dikh raha") is REQUIRED. Honest progress > pretty results.
6. 1 honest negative per 3 positives: if a tester saw no change or mild irritation, that note goes in the content program (not always the same reel — the story "18 continue, 2 nahi — dono ki baat suno" is the format).
7. Language: "dark spots ka dikhna kam" / "tan-look fresh" / "bright-look" — never "removes / cures / khatam / permanent / 100%".
8. Frequency: first B/A = Day 17 (pinned + ad cut). Then: 1-2 disclosed B/A per week, always from the real tester pool + real customers (with consent) after launch.

Consent template (Hindi, keep with the photos):

Main RANGAT NATURALS ka [product] [dates] ke beech use kiya/ki. Yeh photos meri asli photos hain (same light, bina filter). RANGAT inhe Instagram, website aur Meta ads me use kar sakta hai, saath me "Results may vary" likha hoga.

14. MICRO-INFLUENCER STRATEGY (who, how to find, how to evaluate)

Who: 5k-50k followers = the sweet spot for a new brand (reach is real, price is low, audience trusts them more than mega-creators). Categories in order of fit: food/lifestyle Gujarati creators → college/influencer (Ahmedabad/Surat) → beauty/skincare local → fashion (wedding season) → male lifestyle (for the Face Wash wave).

Where to find (2 hours, weekly — put it on the Wednesday slot):

1. Instagram search: `#Amdavad #Ahmedabad #Gujaratfood #Gujaraticreator #Amdavadi #Surat #Vadodara` + skincare tags + "skincare" within the location.
2. Explore page: follow 5 known local accounts → IG serves their circle.
3. YouTube search: "Ahmedabad vlog" (their Shorts/IG cross-post).
4. Local wedding vendors' tagged photos (Gujarat wedding content is gold for Oct-Feb).
5. Your own 20-tester pool: every tester with >1k followers is a nano-creator pipeline (they already used the product).

Shortlist discipline: 10 names on the Sheet by Day 10 · 3-5 contacted/week · 3 creators live by Day 19 (the collab reel) · 15+ UGC videos in the bank by Day 90.

How to evaluate (15 min each — sales > followers, always):

- Engagement rate: (likes + comments) ÷ followers on last 20 posts. Target >4%. A creator with 8k followers and 450 likes/post beats 100k with 300.
- Comment quality: real people commenting in Gujarati/Hindi = real local audience. Bot comments = walk away.
- Audience location check: open commenters' profiles — are they Gujarat/West India? (Your ads target them; her audience should match.)
- Past brand posts: does she tag brands? If the last 50 posts have zero brand content, the collab will look fake on her page — that's a plus for you.
- The DM test: send the template below; a real creator answers with questions. Ghosts = deprioritize (do not burn time).
- Hard no: medical claims in her past posts, fake giveaway history, any brand-damage flags.

Compensation model (standard, in writing — the RANGAT terms):

- Product free (₹0 to creator) + flat fee by tier: 5-10k → ₹500 · 10-25k → ₹1,000 · 25-50k → ₹1,500-2,000
- 20% affiliate commission on their code, first 20 sales (after that, flat fee renegotiates)
- ₹100 per Meta ad-use of their video (stated in the brief — no surprises)
- Deliverable: 1 Reel (15-45s, UGC structure) + written permission to use as a Meta ad
- 4 hard rules in every brief: no medical claims · no "cure/remove/permanent" · "results may vary" on any B/A · no fake urgency/discounts
- Consent line to save with the video: *"Main RANGAT ke liye [product] use kar raha/hoon [dates], apni asli experience ke saath. Video ko IG + Meta ads me use kar sakte ho. — [Name, city, date]"*

15. 10 INFLUENCER CAMPAIGN CONCEPTS (ready to brief)

Each concept: hook · creator action · placement · script skeleton · CTA · deliverables · usage rights · tracking. All compliant (4 hard rules apply to every one).

IC-1 "The First 100" — launch proof (Day 21-30). Hook: "Main Gujarat ki pehli 100 me hoon." Action: creator unboxes the launch box on camera, real first impression, 1 honest pro + 1 honest con. Placement: her feed + RANGAT feed (collab). Script: 3s hook → 5s unbox → 5s texture → 3s honest con ("thoda tight pehle din") → 3s CTA. CTA: "Mera code: [CODE] — DM GLOW pe bhi order hota hai, COD hai." Deliverables: 1 Reel 20-30s + 3 story frames. Rights: 30-day Meta ad use (₹100/use). Tracking: code sales + ad ATC.

IC-2 "4 Hafte Ka Sach" — 4-week honest journey (D21+). Hook: "Day 1. Mera chehra. Dekhte hain kya hota hai." Action: creator films Day 1, Day 14, Day 28 (same light, card in frame) — 3 clips delivered over 3 weeks. Placement: her feed (3 parts) + RANGAT highlights. Script: part 1 honest "abhi kuch nahi" · part 2 "ab dikh raha hai, par..." · part 3 verdict. CTA: "Part 3 me verdict — follow karo + DM GLOW." Deliverables: 3 reels 15-20s. Rights: ad use on part 3 only (with disclosure). Tracking: follower growth of her + RANGAT profile visits from her.

IC-3 "Maa Ki Approval" — family trust (Gujarat gold, D31+). Hook: "Maine maa ko bhi lagaya. Unki baat suno." Action: creator + her mother/relative, 2 real reactions, Gujarati dialogue. Placement: her feed (relatable, high share). Script: 3s setup → 8s maa's honest line ("yeh kya hai?" → try → "achha hai, par...") → 4s creator CTA. CTA: "Apni maa ke saath try karo — DM GLOW, COD hai." Deliverables: 1 Reel 20-30s + 2 story frames. Rights: 60-day ad use (highest-trust creative). Tracking: CPM/CTR vs brand creative (target 2×).

IC-4 "Gym Ka Saath" — routine integration (Surat wave, W4-6). Hook: "9 se 9 office + gym — 60 second kahan se aayega?" Action: creator's morning routine, product drops in at step 2 naturally. Placement: her feed. Script: routine cuts, product in 5s, no hard pitch. CTA: "Routine ka step 2 — DM GLOW." Deliverables: 1 Reel 15-25s + 1 quote card. Rights: 30-day ad use. Tracking: code + link clicks.

IC-5 "Monsoon Check" — weather-driven (Jul-Sep every year). Hook: "Baarish ke din bhi UV aata hai. Pehle bhi nahi lagati thi." Action: creator's monsoon confusion → product as the fix. Placement: her feed + RANGAT (cross-post). Script: problem 3s → myth 2s → product 5s → habit CTA 3s. CTA: "Monsoon routine — DM GLOW." Deliverables: 1 Reel 15-20s. Rights: 30-day ad use. Tracking: seasonal CTR vs baseline.

IC-6 "Wedding Glow Countdown" — Oct-Feb (Vadodara/Surat). Hook: "Shaadi se 6 hafte pehle yeh kiya. Dekho farq." Action: creator (or her friend/relative, WITH DISCLOSURE it's not a wedding claim) shows a 6-week plan with RANGAT as the routine. Placement: her feed + wedding-tag content. Script: countdown frames 6→1, product in the routine, honest pacing. CTA: "Apna countdown shuru karo — DM GLOW." Deliverables: 1 Reel 25-30s + 6 story countdown frames. Rights: 60-day ad use (seasonal). Tracking: waitlist joins (wedding-glow list).

IC-7 "The Lab Visit" — behind-the-brand (trust deep-dive, D45+). Hook: "Formula chunna aisa dikhta nahi. Main dikhati hoon." Action: creator visits the founder's workspace, sees the notebook, 23-version story, tester whiteboard. Placement: her feed (documentary feel). Script: walking tour + 3 founder lines + creator's reaction. CTA: "Hum manufacturer nahi hain — hum chunte hain. DM GLOW." Deliverables: 1 Reel 30-45s + 2 BTS story frames. Rights: 60-day ad use (founder-trust creative for C2/C3). Tracking: profile visits + GLOW DMs (trust funnel, not direct sales).

IC-8 "Men Bhi" — Face Wash wave (D60+, male creators 10-50k). Hook: "Mard bhi skin. 60 second." Action: male creator's 60-second morning routine, face wash in it. Placement: his feed. Script: mirror shine 3s → wash 5s → "ab theek" 3s → CTA 2s. CTA: "60-sec skin — WhatsApp link in bio / DM GLOW." Deliverables: 1 Reel 15-20s + 2 ad cuts. Rights: 30-day ad use. Tracking: code (male) + ad CPA.

IC-9 "Diwali Gift Box" — gifting season (Nov). Hook: "Diwali pe 'dhyan' wala gift — box dekho." Action: creator gifts a RANGAT box to a friend/sister on camera (real gift moment). Placement: her feed +

Diwali tags. Script: box reveal 5s → recipient's real reaction 5s → gift framing 3s → CTA. CTA: "Diwali box — DM GLOW, COD hai." Deliverables: 1 Reel 20-25s + 1 flat-lay photo for ads. Rights: 45-day ad use (seasonal, then archive). Tracking: gifting-box orders (code GIFT).

IC-10 "UGC Factory" — 1 shoot, 6 assets (all waves, repeatable). Hook: varies per brief. Action: 1 filming session at creator's home (you supervise via voice notes or on-site 1 hr) → deliverables: 1 feed reel + 3 story frames + 1 quote card (her best line) + 2 ad cuts (15s + 30s). Placement: her feed (1 asset) + RANGAT (all 6). Script: standard UGC structure. CTA: standard GLOW. Deliverables: the 6-asset pack. Rights: 90-day Meta ad use (₹100 per use, per asset). Tracking: per-asset performance in the ad library (which cut wins = next shoot's template).

Creator KPIs (Sunday review): creators contacted / accepted / content live / code sales / ad ROAS of creator creatives vs brand creatives (UGC should run $\approx 2\times$) / cost per UGC asset (target $< ₹800$).

16. META ADS (exactly when, what, and how much)

16.1 The CEO call: ads on Day 1? NO.

1. A new cosmetics brand with zero reviews running ads on Day 1 = paying ₹150-₹300 per "hmm, who is this?" that never converts. Indian skincare prospecting CPMs are already high (₹100-260) because every D2C brand fights for the same feed.
 2. A new account with no content history gives Meta no relevance data — the algorithm has nothing to optimize toward.
 3. BUT waiting 90 days wastes the launch window (Oct-Feb = wedding/Diwali season). So the established plan: organic-only Days 1-14 → optional ₹200/day boost Days 15-20 (only on organic-validated reels) → full ads from Day 21 (launch) at ₹500/day.
- Boost rule (D15-20): take the ONE reel with the best organic ratio (saves+shares ÷ reach > 8%), boost ₹200/day, 3-day window, same audience as C1 Ad Set B (Gujarat + interest). It is a reach test, not a conversion campaign. Kill it on Day 20; let C1 start clean.

16.2 The 4 campaigns (structure, audience, geo, creative, metrics)

C1 — "GLOW PROSPECT" (cold, conversions) — LIVE DAY 21:

Item	Spec
Objective	Sales → WhatsApp Messages (India's COD reality: the sale happens in DM)
Ad Set A	Broad — Ahmedabad + radius, 18-45, all genders (women-skincare creative will self-select), no interests. ₹300/day
Ad Set B	Interest — Gujarat + West India, 18-35 women, interests: skincare, beauty, vitamin C, D2C brands, Amazon shopping. ₹200/day
Budget	₹500/day total
Creatives (4)	① Story Testimonial (D26 customer) ② 4-Hafte B/A (D17, disclosed) ③ Launch film (D21) ④ Texture 8s (AI bank, labeled brand visual)
Kill/scale	7-day window; rank by ATC cost (add-to-cart / WhatsApp lead cost); scale the winner +30% every 48h while CPA ≤ 1.2× target

Why broad works at ₹500/day: with 1 broad ad set + 3-4 creatives, Meta's algorithm does the audience work — and for skincare, broad frequently beats interest stacks in India (interests = smaller pool = higher CPM + less optimization room).

C2 — "PROOF & LAL" (warm + lookalike) — LIVE DAY 35+ (after 50+ purchases):

Item	Spec
Audience	1% lookalike of purchasers + engagers (IG + WhatsApp list)
Creatives	UGC review clips (2-3), B/A carousel, "18 continue, 2 nahi" honesty reel
Budget	₹500-₹1,000/day (start ₹500: split 300/200)
Why	Warm audiences convert at 2.8-4.5× ROAS vs 1.8-3.2× prospecting — the profit engine

C3 — "RECOVER" (retargeting stack) — LIVE DAY 25+:

Item	Spec
Audiences (R1-R7)	R1: IG engagers 30d · R2: website/product viewers 30d · R3: video viewers 50%+ 30d · R4: WhatsApp leads who didn't buy 14d · R5: add-to-cart 14d · R6: purchasers 90d (exclude from prospecting) · R7: bio-visitors 14d (custom)
Budget	₹200-₹300/day total (split: ① ₹100 ② ₹60 ③ ₹50 ④ ₹30 — scale whichever has CPA ≤ ₹150)
Creative per audience	R1/R3/R7: proof (B/A, review) · R4/R5: COD + seat-count urgency (REAL numbers) · R6: repeat (new product wave)

Item	Spec
Frequency cap	≤3-4/wk per person; 15-25% of total ad spend lives here

C4 — "SCALE" (Advantage+ / broad scale + new product) — LIVE DAY 60+:

Item	Spec
Structure	Advantage+ shopping campaign, ₹1,000/day start, +30% every 3 days while CPA ≤ target
Geo	Gujarat + 6 India cities (Mumbai, Delhi NCR, Bengaluru, Pune, Hyderabad, Kolkata) — add a city only if its CPA ≤ 1.3× Gujarat CPA; pause any city 2× worse
Creative	Sunscreen hero (wave 2) + top 2 proven C1 creatives
Success metrics	Blended CPA ≤ ₹300, ROAS ≥ 2.5x

Campaign sequencing: D21 C1 ₹500 → D25 C3 ₹200-300 → D35 C2 ₹500 → D60 C4 ₹1,000 → D90 full engine C1+C2+C3+C4 = ₹2,000-5,000/day with weekly optimization rhythm.

16.3 The 5 budget plans (₹300 / ₹500 / ₹1,000 / ₹2,000 / ₹5,000 per day)

Plan	When	Allocation (per day)	What it buys
₹300	Pre-launch micro-test (D15-20 boost window; default is ₹200 — never exceed ₹300 here)	1 organic-validated reel, boost, Gujarat + interest, 3-day windows	Reach + follower base for launch; no cold-conversion spend before D21
₹500	Launch (D21+)	C1: Ad Set A broad ₹300 + Ad Set B interest ₹200, 4 creatives, WhatsApp objective	The first real sales engine; ATC data for the whole system
₹1,000	D35-59 (proof phase)	C1 ₹500 + C2 ₹200-300 + C3 ₹200-300	Warm engine added; CPA should fall as LAL + retargeting kick in
₹2,000	D60+ (scale phase)	C4 ₹1,000 + C1 ₹500 + C2 ₹300 + C3 ₹200	National cities enter; sunscreen wave 2 handoff
₹5,000	D90+ / seasonal peak (Diwali, wedding)	C4 ₹2,500 + C1 ₹1,000 + C2 ₹750 + C3 ₹750 (retargeting stays 15-25%)	Full engine at season peak; only after CPA ≤ ₹300 proven for 2 straight weeks

Rules that apply to EVERY plan: scale in +30% steps every 48-72h while CPA ≤ 1.2× target — never double the budget in one jump (it resets the learning phase). Kill creative at CPM +30% / CTR -25% / CPA +50% (fatigue). Retargeting never exceeds 25% of total spend. CPA targets: ≤₹300 in Month 2, ≤₹250 by Day 90; ROAS ≥3x by Day 90. The LTV math (repeat 10-15% by D60 + referral) makes a ₹300 CAC viable — that is why we can afford to pay for the first order.

16.4 Creative specs (what an ad actually is)

- Format: 9:16 Reel-first (UGC style) + 4:5 static for feed (product flat-lay + 1 line). Always: hook text in first frame, "Results may vary" on any B/A, real product label visible.
- Primary text formula: [problem in their words] + [how it helps, safe claim] + [risk killer: COD] + [one action: DM GLOW / click WhatsApp]. Max 3 lines above the fold.
- Headline: "Vitamin C 10% — COD, Gujarat me 2-4 din" style (benefit + risk-killer).
- CTA button: "Send WhatsApp Message".
- Testing (every campaign): 4-8 creatives live, 7-day window, rank by ATC cost first (then CPA, CTR, ROAS in that order). Winner: +30%/48h. Fatigue signals: CPM +30% / CTR -25% / CPA +50% → rotate with fresh cut.
- The first ad is ALWAYS "The Story Testimonial" (D26 format) — UGC runs ≈2× brand creative in ROAS.

17. UGC → ADS PIPELINE (step by step)

The machine that turns one phone video into your cheapest sales channel:

1. Get the content (4 sources): creator collab (Section 14–15) · real customer with consent (D24/D26) · your own UGC-style shoot (founder/friend, manual templates) · AI-labeled concept teasers (Section 5 — NEVER as customer proof).
 2. Paper trail BEFORE publishing: written consent + ad-use permission (₹100/use stated) saved with the video file. No paper, no ad.
 3. Build the 3 cuts (CapCut, 2 hours per source): Cut A = 15s (hook 2s → problem 3s → product 5s → CTA 3s) · Cut B = 30s (story arc + mid retention hook) · Cut C = ad static (best frame + hook text + "Results may vary" if B/A).
 4. Add the ad layer: hook text top-frame, brand tag "RANGAT NATURALS", CTA card last 1.5s ("DM GLOW · COD"), audio = her real voice (no TTS, no trending audio on proof content).
 5. Feed C1 as creative #5–8 (4 max live per ad set — rotate: 4 live, 4 bench).
 6. 7-day window: read ATC cost per creative. Kill losers (fatigue/CPA rules), scale winners +30%/48h while $CPA \leq 1.2 \times$ target.
 7. Promote winners to C2/C3 (warm + retargeting love UGC most — 2.8–4.5× ROAS zone).
 8. Log everything in the Sheet "Ads" tab: source creator / cut / campaign / spend / ATC / CPA / ROAS / status. Weekly: which creator/cut type wins → next shoot brief.
 9. Refresh cycle: every 2 weeks, 2 fresh UGC sources enter the pipeline (2 creators or 2 customers) — the bank never runs dry.
- Bank targets: 40–60 assets in the UGC bank by Day 90 (20 creator + 15 customer + 15 self-shoot + 10 AI-labeled concept) — this is your ad inventory for the scale phase.

18. SALES STRATEGY — which post does which job, and the funnel

18.1 Post roles (every post is tagged with ONE job before it ships)

Role	Share (after D15)	Jobs	Calendar days (examples)
Awareness	20%	Make strangers stop	D1, D2, D5, D11, D15, D25
Education/Authority	25%	Make RANGAT the smart choice; feed search	D3, D4, D7, D10, D18, D23, D28
Trust	30%	Convert evaluators who are "maybe"	D6, D9, D12, D13, D16, D17, D19, D24, D26
Conversion (direct sell)	20%	Collect the DM	D8, D14, D20, D21, D27, D29
Retention	post-purchase	D1/7/14/28 WhatsApp + D29 referral + repeat content for purchasers (C3 R6)	always-on

The 1-in-5 rule: after Day 15, exactly 1 of every 5 posts is direct-sell (max 3-in-9 in offer windows). If a week has 2 sell posts in a row, the next post is Trust or Education — no exceptions.

18.2 The funnel (and where each stage lives)

REEL → PROFILE → TRUST → PRODUCT → WEBSITE/WHATSAPP → PURCHASE → REVIEW → REPEAT → REFERRAL

Stage	What happens	KPI	Target
Reel	Hook stops the stranger; SEO makes it findable	Reach, 3s-hook rate, watch %	Reel views from non-followers >50%
Profile	3-second test: bio + pins + highlights	Profile visits / reach	10–15% of reel viewers
Trust	RESULTS highlight + B/A pin + review stories	Time on profile, saves	—
Product	Hero pin (what to buy + how) + product reels	Product-page interest	—
Website / WhatsApp	Bio link → WhatsApp click-to-chat (or site if live)	Link clicks → chats	25–40% of profile visits
Purchase	GLOW 5-step DM script → COD order (2–4 days Gujarat)	DM→order conversion, COD fail	DM→order 35–45% (launch: 25–40%), COD fail <15%
Review	D1/D7 WhatsApp touches + review request (25–35% response)	Review rate	1 in 3 customers
Repeat	D14/28/45/60 touches + wave-2 offer to purchasers (C3 R6)	Repeat by D60	10–15%
Referral	D29 launch: do ₹100, lo ₹100	Referral orders	10–20% of orders by D60

18.3 The GLOW DM script (5 steps, 15-minute SLA)

1. Greet + answer (0–2 min): "Namaste! Vitamin C Serum 10% — ₹600 (launch me free Face Wash mini + free shipping). COD hai. Aapka skin type kya hai — oily/dry/combo?" (a question first = a conversation, not a chatbot)
2. Qualify + reassure (2–5 min): answer their #1 fear (fake? result? time?) with the batch card + COD + 4–6 hafte honest timeline. One proof asset attached (B/A story link or review clip).

3. Close (5-10 min): "Aaj order karo toh launch me free Face Wash mini + free shipping. Aapka naam + city + WhatsApp number?" — then confirm the order summary in writing.
4. After order (same day): WhatsApp confirmation + "parcel 2-4 din" + care instructions card.
5. D1/7/14/28: "Aaya? Khol diya?" (D1) · "Roz lag rahe? Koi redness?" (D7) · "Abhi tak kya dikh raha hai?" (D14) · "4 hafte — photo bhej do (same light). Review 1 line bhi kaafi hai." (D28)

Rule: every DM gets a human reply in 15 min (7 AM-11 PM). The DM is the shop floor — it is where the business actually happens.

19. WEEKLY PRODUCTION SYSTEM (1 person + 1 part-time, ~12-15 hrs/week)

The whole week fits in five working blocks. Batching is the point: shoot 2 days, post 7.

Day	Block	Hours	Exactly what gets made
Mon	Plan	1 h	7 hooks written (from last week's DM data + hook sheet); 2 carousel outlines; next week's calendar locked in the Sheet
Tue	Shoot #1 (reels)	4.5 h	8-10 reels (all manual-first: face + product + BTS) + 4 ad cuts from the best 15s + 10-12 story frames for the week
Wed	Ads + creators	1 h	Ad review (spend/ATC/CPA, kill/scale decisions) + 2-3 creator DMs (templates T1-T6)
Thu	Shoot #2	3 h	Carousel photos (2 carousels: 10-12 flat-lays) + product/texture close-ups + AI prompt batch (2-3 AI B-roll reels generated, 1 h of waiting)
Fri	Repurpose + SEO	1 h	Top 3 reels → YT Shorts (title formula) + hashtag rotation set + calendar lock for next week
Sat	KPI + scripts	1.5 h	Weekly KPI review (Section 21) + DM audit (10 random DMs re-read: where did they stall?) + next week's scripts drafted
Sun	Formal close	1 h	KPI board updated + budget decisions + 30-min profile audit: "what will a stranger think?" (log in as a new account, sit on the profile for 30 seconds)

Weekly output numbers (the floor, not the ceiling): 7 reels published (5-7/wk) · 2 carousels · 3-5 story frames × 7 days (the 3 slots) · 4 ad cuts in the bank · 2-3 creator conversations · 15 min/day Stories · 30-60 min/day DMs (the real job).

Team & money: founder (content + DMs + strategy) + 1 part-time (editing ₹8-15k/month; phone + ₹500 tripod + one lamp <₹10k total gear). 3-week content buffer always (shoot 3 weeks ahead — launch week never improvises).

The master Sheet (6 tabs — build in Day 0, 45 min): ☐ Content calendar (the 21 fields per day) ☐ Hook log (hook / style / date / views / saves / DMs / verdict) ☐ UGC bank (source / consent file / cuts / rights / status) ☐ Ads (campaign / ad set / creative / spend / ATC / CPA / ROAS / status) ☐ Creators (name / followers / ER / stage / terms / content) ☐ KPI board (weekly, Section 21).

Weekly production checklist (Thursday night, 10 min):

- ☐ 7 hooks written (none repeated this month)
- ☐ 8-10 reels shot (or AI B-roll generated + real VO recorded)
- ☐ 4 ad cuts in the bank
- ☐ 2 carousels designed (one master template)
- ☐ 15+ story frames shot (3 slots × 5 days)
- ☐ 2-3 creator DMs sent
- ☐ Calendar locked for next week (times from Section 10)
- ☐ Buffer ≥ 3 weeks

20. THE 30-DAY CALENDAR + THE DAY 31-90 LOOP

Days 1-30: the full 21-field, day-by-day execution calendar is Section 3 of this guide — every day has: platform, post type, exact idea, purpose, target customer, hook, content structure, script, on-screen text, caption, CTA, SEO keywords, hashtags, location, posting time, story support (M/A/E), AI prompt (Option A) and the free manual method (Option B). Execute it in order. The week rhythm inside it: W1 = brand+problem (D1-7) · W2 = product+education (D8-14) · W3 = proof+launch build (D15-20) · W4 = LAUNCH + conversion (D21-30).

Milestones the calendar is engineered for: D17 first B/A (pinned) · D19 first creator collab · D21 LAUNCH (Founding 100: launch price + free Face Wash mini + free shipping + COD + featured review, 100-unit cap) · D29 referral launch (do ₹100, lo ₹100) · D30 KPI review: 80-100 orders, 600-1,000 GLOW DMs, DM→order 25-40%, 1-2k followers, COD fail <15%.

Day 31-60 (Wave 2 — Sunscreen)

- Product wave: Moisturizer enters D31 (soft mention, not sold) · Sunscreen = the wave-2 hero from D45-60 (waitlist built D18 + D28 + all stories).
- Content shift: 40% sunscreen content (SPF education, "baarish me sunscreen?", reapply, no white cast), 30% VC proof (the 4-hafte cohort #2), 20% founder/BTS, 10% sales.
- Posting: same rhythm (7 reels, 2 carousels, 3 story slots); new hashtag set #6 live; carousel C10 (SPF basics) live.
- Creators: +2 city creators (Surat W4-6, Vadodara W6-8); IC-4/IC-5 concepts live.
- Ads: C4 live D60 (₹1,000/day) with +6 India cities; sunscreen creative enters C1 rotation.
- SEO: sunscreen keyword bank (set 6) — "no white cast sunscreen", "spf 50 india" get the dedicated monthly keyword Reel.
- Sales: wave-2 offer to ALL purchasers (C3 R6 retargeting: "aapne serum liya — ab SPF"); COD unchanged.
- KPIs (D60): 400-500 cumulative orders · 3,000+ followers · CPA ≤ ₹300 · 15+ UGC assets in bank · repeat 10% among D1-30 buyers.

Day 61-90 (Wave 3 — Night Cream + Diwali + the Machine)

- Product wave: Night Cream D75-90 (waitlist built D28 + stories) · gifting boxes Oct-Dec (Diwali: code GIFT, IC-9 concept).
- Content shift: 35% night-routine + Diwali gifting, 30% proof (3 cohort B/A's), 15% founder, 20% sales/gifting.
- Creators: 60% Gujarat / 40% other cities; IC-7 (Lab Visit) + IC-9 (Diwali) live; UGC bank at 40-60 assets.
- Ads: full engine ₹2,000-5,000/day (plan in 16.3); retargeting 15-25%; seasonal peak budget only if CPA ≤ ₹300 for 2 weeks.
- SEO: "ahmedabad skincare brand" + long-tail Shorts bank gets 3 uploads/week; monthly keyword audit now from real data.
- Sales: referral engine at 10-20% of orders; repeat 10-15%; COD fail <15% steady.
- KPIs (D90): 900-1,200 cumulative orders · 5-8k followers · ROAS ≥3x · LTV:CAC ≥2.5 · CPA ≤ ₹250.

The loop after 90 days: every 30-day block re-runs the calendar template with (a) the current wave product, (b) the current city wave, (c) the current season — 21 fields, same discipline, fresh hooks from the hook log's top-10 rewrites.

21. ANALYTICS SYSTEM (weekly metrics + what to do when things misbehave)

21.1 The weekly KPI review (Sunday, 45 min — the KPI board, 6 tabs)

Metric	Where	Weekly target (Months 1-3)
Followers	Sheet ⑥	100 (D7) · 500 (D21) · 1,000 (D45) · 5,000 (D120)
Reel reach (non-follower share)	IG Insights	>50% from non-followers (growth is working)
Saves + shares per reel	IG Insights	Saves: education >8%; shares: relatable >3%
Profile visits	IG Insights	10-15% of top reel's reach
Link clicks → WhatsApp chats	WA/insights	25-40% of profile visits
GLOW DMs	WhatsApp log	600-1,000 total by D30
DM → order	Sheet ①	25-40% (launch), 35-45% (steady)
Orders	Sheet ①	80-100 by D30 · 400-500 by D60 · 900-1,200 by D90
COD failure	Courier data	<15%
Review rate	Sheet ①	25-35% of orders
Repeat (by D60 cohort)	Sheet ①	10-15%
Referral share	Sheet ①	10-20% by D60
Ad: CPM / CTR / ATC cost / CPA / ROAS	Meta + Sheet ④	CPM ₹100-260 · CTR 1.2-2.5% · CPA ≤₹300 M2, ≤₹250 D90 · ROAS ≥3x D90
UGC bank size	Sheet ③	+5 assets/week; 40-60 by D90

Every Sunday, 3 decisions max (scale / kill / fix) — more decisions than that means the system is too complicated.

21.2 The 6 diagnostic playbooks (symptom → exact action)

SYMPTOM 1 — LOW VIEWS (reel reach < 500 after 24h, 3+ reels in a row):

1. Check the 3s-hook: did the first frame have spoken hook + text + face/product movement? If no → rewrite hook (use a different style from Section 4; never the same style twice).
2. Check watch time: if avg <3s, the hook failed; if 6-12s then drop, the middle is dead → add a pattern interrupt at 2-5s and a new visual every 5-7s.
3. Check posting time: is it inside your current best window (Section 10)? Move one variable, retest 3 reels.
4. Check format: same format 3 times in a row? Rotate (Section 7 duration table).
5. Last resort (after 3 failed rewrites): the topic isn't landing — kill the topic, take the next from the hook log.

SYMPTOM 2 — HIGH VIEWS, NO SALES (reel goes far, GLOW DMs flat):

1. You are attracting the wrong buyer or the reel has no purchase path. Check: does the reel mention WHAT to buy, PRICE, COD, and the ONE action? If no → the reel is entertainment without a bridge; add a 2s bridge before the CTA ("agar aap oily skin wali ho — DM GLOW, COD hai").
2. Check the profile: a stranger landing from a viral reel has 3 seconds — re-run the profile audit (bio line 2 lists the product; pins 1-3 = buy/trust/who; RESULTS highlight first).
3. Check the DM funnel: are replies within 15 min? A viral hour with a dead DM line = lost orders.
4. Check the offer's visibility: the current offer (Founding 100 → then current) must be in the OFFER highlight + bio link, not only in the reel.

5. Verdict: views without sales = awareness spend. Fine for 2 reels/week; if 4+ in a row, shift the mix toward Trust + Conversion (Section 12).

SYMPTOM 3 — HIGH SAVES (saves >8% of reach, shares low):

- You are the "smart brand" — the moat is building. Action: (a) turn every high-save carousel into a Reel version (voice-over the same 6 slides in 45s) — saves mean the topic wins in video too; (b) tag the saves in a series name ("Skin 101 #8") so the search shelf compounds; (c) use the saved topics as next month's keyword Reels (Section 2.3 rule 5); (d) retarget engagers with proof creatives in C3 (savers = evaluators).

SYMPTOM 4 — HIGH SHARES (shares >3% of reach, saves low):

- You are the "share machine" (relatable content, D5/D14/D29 types). Action: (a) double down on the relatable format for 2 weeks (it is pulling strangers in); (b) every 3rd relatable reel must end with a 1-line product bridge (relatable → product → GLOW) or it never converts; (c) check who is sharing (Gujarat circle = local wave working; outside Gujarat = national interest, tag it in the Sheet for C4 city selection); (d) pin the top share reel to Pin 3 if it carries the brand story.

SYMPTOM 5 — HIGH PROFILE VISITS (but low link clicks / GLOW DMs):

- The profile loses them after the 3-second test. Action: (a) sit on your own profile for 30 seconds as a stranger — what do you NOT immediately understand? (b) Fix ONE thing per week: bio line order (product must be in line 2) → highlights (RESULTS first) → pins (buy/trust/who) → link (WhatsApp first, 3 items max); (c) check the OFFER highlight has the current offer live; (d) add a pinned story on the profile ("Naya yahan? Yeh 3 pehle dekho" → results → how to order → COD).

SYMPTOM 6 — HIGH LINK CLICKS, NO PURCHASES (WhatsApp chats open, orders don't close):

- The DM/shop-floor is leaking. Action: (a) re-read 10 dead chats (Sat 1.5h block) and find the stall point: price? trust? timing? fear? (b) If price → add the "20 chai, 4 hafte" value frame (D14 script) + COD-first phrasing ("paisa parcel ke baad"); (c) if trust → attach the batch card photo + B/A story link in the 2nd DM (not the 1st — conversation first); (d) if timing → the auto-reply + "15 min me reply" line must be there; (e) if the stall is "soch lu" → one soft-close per chat: "Aaj order karo toh free Face Wash mini + free shipping — launch window hai. Kal se sirf serum." (TRUE urgency — the cap is real); (f) measure DM→order weekly; below 25% = the script (18.3) is not being followed.

The 90-day verdict test (Day 90, 1 hour, written): orders on track? CPA ≤₹250? UGC bank 40+? Repeat 10%? Referral live? If 4 of 5 = "scale the budget plan one step + 1 full-time editor". If ≤3 = "fix the leaking stage first (Section 21 playbooks), no budget step".

23. THE DAILY EXECUTION CHECKLIST (10 minutes, before you close the phone)

- [] 1 reel posted at the day's posting time (Section 10) — hook verified: spoken + text + face in 2s
- [] 3 story slots posted (8 AM / 1 PM / 8 PM) — evening slot ends with a DM CTA or link sticker
- [] First 60 minutes: every comment replied (within the hour); 2-3 genuine comment prompts seeded
- [] DMs: every GLOW answered within 15 min (7 AM-11 PM); dead chats moved to the Sat audit
- [] WhatsApp Status mirrored (3 slots, same day)
- [] Alt text + location tag + 8-15 hashtags (rotated, never identical to yesterday)
- [] 1 production block done (Mon plan / Tue shoot / Wed ads+creators / Thu shoot 2 / Fri repurpose / Sat KPI / Sun close)
- [] Sheet updated (content / hook / UGC / ads / creators tabs — 5 min)
- [] 1 forward action for tomorrow written in the Sheet (tomorrow's hook, tomorrow's DM, tomorrow's shoot)
- [] The CEO question answered: which stranger bought today, and which one will buy because of what I post tomorrow?

24. COMPLIANCE RED LINES (the 8 non-negotiables)

1. No fake reviews, testimonials, or results. Every review = a real customer, on camera or in writing, with consent on file. "Humari page pe 1 bhi fake review nahi" is both a promise and a policy.
2. No fake before/after. Only the disclosed "Day 1 → Day 28" format (Section 13) — same light, card in frame, "Results may vary" on every export.
3. No fake followers or fake engagement. No buying, no follow-back farms, no engagement pods. The 80–100 orders target is real DMs from real reels — nothing else.
4. No guaranteed results, no medical claims, no "cure / remove / permanent / 100%". Safe language: "dikhna kam karta hai", "help karta hai", "4–6 hafte ka honest timeline".
5. No unverified claims. If it is not on the formula sheet or the 20-tester report, it is not on the label or in the reel.
6. No downloading copyrighted content — including from Instagram. Free licensed stock only (Pexels/Pixabay/Unsplash), used as B-roll with your own edit/voice/branding on top (Section 6.1).
7. No misleading ingredient or price claims. "10% Vitamin C" = the formula's 10%. "Sasta" is never a claim; "value" is explained (20 chai, 4 hafte — the real math).
8. AI is labeled and never impersonates customers. AI = concept/teaser/B-roll with "AI concept" label; real customers are real humans with written consent (Section 5, rule 1).

SAFE vs UNSAFE — the 30-second check before any post ships:

SAFE	UNSAFE
"Dark spots ka dikhna kam karta hai (4–6 hafte, regular use)"	"Dark spots khatam, 100% guarantee"
"Tan-look fresh dikhane ke tips"	"Tan hamesha ke liye remove"
"Aapki skin pe result alag ho sakta hai — Results may vary"	"Sab pe aisa hi result aayega"
"20 testers, 4 hafte, honest photos (disclosed)"	Stock/AI "customer" photos
"COD — pehle dekho, phir paisa do"	"Limited stock!" (when it is not true)
"Hum manufacturer nahi hain — formula chuna, 20 aahaiyon pe test kiya"	"Our factory/lab" (you are not a manufacturer)

The final rule: when in doubt, show the receipt (batch card, consent file, tester photo) — or don't post it.
